Byggdokumentation – Markritningar (ISO 11091:1994)

Construction drawings – Landscape drawing practice (ISO 11091:1994)

Standarder får världen att fungera

SIS (Swedish Standards Institute) är en fristående ideell förening med medlemmar från både privat och offentlig sektor. Vi är en del av det europeiska och globala nätverk som utarbetar internationella standarder. Standarder är dokumenterad kunskap utvecklad av framstående aktörer inom industri, näringsliv och samhälle och befrämjar handel över gränser, bidrar till att processer och produkter blir säkrare samt effektiviserar din verksamhet.

Delta och påverka

Som medlem i SIS har du möjlighet att påverka framtida standarder inom ditt område på nationell, europeisk och global nivå. Du får samtidigt tillgång till tidig information om utvecklingen inom din bransch.

Ta del av det färdiga arbetet

Vi erbjuder våra kunder allt som rör standarder och deras tillämpning. Hos oss kan du köpa alla publikationer du behöver – allt från enskilda standarder, tekniska rapporter och standardpaket till handböcker och onlinetjänster. Genom vår webbtjänst e-nav får du tillgång till ett lättnavigerat bibliotek där alla standarder som är aktuella för ditt företag finns tillgängliga. Standarder och handböcker är källor till kunskap. Vi säljer dem.

Utveckla din kompetens och lyckas bättre i ditt arbete

Hos SIS kan du gå öppna eller företagsinterna utbildningar kring innehåll och tillämpning av standarder. Genom vår närhet till den internationella utvecklingen och ISO får du rätt kunskap i rätt tid, direkt från källan. Med vår kunskap om standarders möjligheter hjälper vi våra kunder att skapa verklig nytta och lönsamhet i sina verksamheter.

Vill du veta mer om SIS eller hur standarder kan effektivisera din verksamhet är du välkommen in på www.sis.se eller ta kontakt med oss på tel 08-555 523 00.

Standards make the world go round

SIS (Swedish Standards Institute) is an independent non-profit organisation with members from both the private and public sectors. We are part of the European and global network that draws up international standards. Standards consist of documented knowledge developed by prominent actors within the industry, business world and society. They promote cross-border trade, they help to make processes and products safer and they streamline your organisation.

Take part and have influence

As a member of SIS you will have the possibility to participate in standardization activities on national, European and global level. The membership in SIS will give you the opportunity to influence future standards and gain access to early stage information about developments within your field.

Get to know the finished work

We offer our customers everything in connection with standards and their application. You can purchase all the publications you need from us - everything from individual standards, technical reports and standard packages through to manuals and online services. Our web service e-nav gives you access to an easy-to-navigate library where all standards that are relevant to your company are available. Standards and manuals are sources of knowledge. We sell them.

Increase understanding and improve perception

With SIS you can undergo either shared or in-house training in the content and application of standards. Thanks to our proximity to international development and ISO you receive the right knowledge at the right time, direct from the source. With our knowledge about the potential of standards, we assist our customers in creating tangible benefit and profitability in their organisations.

If you want to know more about SIS, or how standards can streamline your organisation, please visit www.sis.se or contact us on phone +46 (0)8-555 523 00

Europastandarden EN ISO 11091:1999 gäller som svensk standard. Detta dokument innehåller den officiella engelska versionen av EN ISO 11091:1999.

Denna standard ersätter SS 32262, utgåva 1.

The European Standard EN ISO 11091:1999 has the status of a Swedish Standard. This document contains the official English version of EN ISO 11091:1999.

This standard supersedes the Swedish Standard SS 32262, edition 1.

Uppllysningar om sakinnehållet i standarden lämnas av SIS, Swedish Standards Institute, telefon 08-555 520 00. Standarder kan beställas hos SIS Förlag AB som även lämnar allmänna uppllysningar om svensk och utländsk standard.

Information about the content of the standard is available from the Swedish Standards Institute (SIS), telephone +46 8 555 520 00. Standards may be ordered from SIS Förlag AB, who can also provide general information about Swedish and foreign standards.

Standarden är framtagen av kommittén för Bygg- och förvaltningsdokumentation, SIS/TK 269.

Har du synpunkter på innehållet i den här standarden, vill du delta i ett kommande revideringsarbete eller vara med och ta fram andra standarder inom området? Gå in på www.sis.se - där hittar du mer information.

EUROPEAN STANDARD

EN ISO 11091

NORME EUROPÉENNE

EUROPÄISCHE NORM

July 1999

ICS 01.100.30

English version

**Construction drawings - Landscape drawing practice (ISO
11091:1994)**

Dessins de construction - Pratique en matière de dessins
de paysages (ISO 11091:1994)

Zeichnungen für das Bauwesen - Zeichnungen für
Außenanlagen (ISO 11091:1994)

This European Standard was approved by CEN on 20 May 1999.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Central Secretariat has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.

EUROPEAN COMMITTEE FOR STANDARDIZATION
COMITÉ EUROPÉEN DE NORMALISATION
EUROPÄISCHES KOMITEE FÜR NORMUNG

Central Secretariat: rue de Stassart, 36 B-1050 Brussels

Foreword

The text of the International Standard from Technical Committee ISO/TC 10 "Technical drawings, product definition and related documentation" of the International Organization for Standardization (ISO) has been taken over as an European Standard by CEN/CS.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by January 2000, and conflicting national standards shall be withdrawn at the latest by January 2000.

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and the United Kingdom.

Endorsement notice

The text of the International Standard ISO 11091:1994 has been approved by CEN as a European Standard without any modification.

Construction drawings — Landscape drawing practice

1 Scope

This International Standard establishes general rules and specifies graphical symbols and simplified representations for landscape drawing practice.

The graphical symbols and simplified representation are jointly referred to as conventions. The conventions given in International Standards which are applicable to landscape drawings are presented in annex A.

2 General rules

The extent of information shown on landscape drawings will depend on the degree of accuracy required by the type of work.

Production drawings shall be adequately dimensioned to allow for accurate setting out.

In certain circumstances it is desirable to make final adjustments on site (e.g. tree positions). In such cases drawings shall be suitably annotated.

Existing and proposed levels shall be shown, either as spot levels or as contours or both where appropriate. The vertical interval of contours and the spacing of grid levels depend on the character of the site and the nature of the project.

Similar areas shown on different drawings should be appropriately cross-referenced.

3 Conventions

If necessary, the convention (graphical symbol or simplified representation) can be completed by

- text;
- designations or abbreviations explained on the drawing or associated documents;
- complementary additions to conventions in order to communicate further information.

Nonstandardized conventions shall be explained on the drawing.

Reference No.	Element	Convention	Applied example	Comment
3.1	Subdivision of plant beds/grass			Thin dashed line; areas may be hatched or shaded
3.2	Tangent point or point of transition			
3.3	Existing contour	 or 		Thin continuous or thin dashed line
3.4	Proposed contour			Thick continuous line For 3.3 and 3.4, the numerical value for level may be inserted on the contour line
3.5	No-cut no-fill line			Freehand thin chain line
3.6	Outline of areas to be protected			Thick chain line; area may be hatched or shaded Applied example shows: A = Tree to be protected B = Trunk to be protected
3.7	Outline of existing shrub and woodland areas			Thin continuous irregular line
3.8	Outline of proposed shrub and woodland areas			Thick continuous irregular line

Reference No.	Element	Convention	Applied example	Comment
3.9	General area to be removed			Thin dashed line; this symbol is an alternative to ISO 7518
3.10	Embankment			Thin line (shown only if contours are not used) Top and bottom edges may be indicated by thin continuous lines
3.11	Direction of flow, e.g. land drains/subsurface drains, etc.			Thin continuous line; arrow indicates direction of fall (cf. ISO 4067-6)
3.12	Fence			Thick/thin continuous lines Applied example is a combination of 3.12 and 3.13
3.13	Stile			Thick line
3.14	Retaining wall			Thick/thin continuous lines
3.15	Sheet pile			Thick line
3.16	Grass			May be designated by text instead of shading
3.17	Plant bed			Hard landscape drawings only (see figure A.2)

Reference No.	Element	Convention	Applied example	Comment
3.18	Proposed shrub/plant			Spread may be shown Number of species may be linked together with a thin line and annotated on drawing, or numbered by reference to a schedule For even distribution of large numbers (e.g. ground cover) individual dots are not essential (see figure A.1)
3.19	Climber			Species may be linked
3.20	Existing hedge to be retained			Thin irregular line
3.21	Proposed hedge			Thick irregular line a) Conventional b) Alternative showing plant positions
3.22	Existing tree			The crown circle is drawn with a thin line and the trunk circle with a thick line Trunk and crown circles shall be drawn approx. to scale; size of trunk to be measured as diameter 1 m above ground level
3.23	Proposed tree			The crown circle is drawn with a thick line and the cross with a thin line; circle is not drawn to scale and does not represent the crown at planting or at maturity
3.24	Tree pit			Thick line square border; thin dashed line for diagonals
3.25	Small unit paving			Thin line; pattern is representational only
3.26	Large unit paving			Thin line; pattern is representational only

Reference No.	Element	Convention	Applied example	Comment
3.27	Cobbles			Thin line; pattern is representational only
3.28	Hose point			Thick line
3.29	Sign			Extra-thick line; applied example shows sign fixed to two poles
3.30	Luminaire – any type			Thick line circle; thin line cross
3.31	Luminaire + wall bracket			Thick line circle + bracket; thin line cross
3.32	Pole + arm + luminaire			Thick line circle + arm + pole; thin line cross
3.33	Bollard + low-level luminaire			Thick line circle; thin line cross

4 Schedules

New planting should normally be scheduled.

Planting schedules may be split into trees, shrubs and other plants.

A planting schedule may contain the following information in the sequence listed below:

- name;
- classification/designation;
- root system;
- planting location;
- quantity.

Other information such as height, spread, form, cost, etc. may be included (see table 1).

Schedules may be prepared on separate sheets or may be included as additional information on the planting plan. If schedules are prepared on one or several sheets, each sheet should have its own title block placed below the schedule.

Table 1 — Typical tree-planting schedule

Name	Designation	Height/girth	Root system	Planting location			Quantity	Unit price	Total cost
				A1	A2	A3			
<i>Betula pendula</i> <i>Tristis</i>	Feathered	3,50 m/ 100 mm	Bare root		2	3	5		
<i>Robinia</i> <i>pseudoacacia</i>	Tall standard		Bare root	3			3
