Lighting columns – Part 5: Specification for steel lighting columns

The European Standard EN 40-5:2000 has the status of a Swedish Standard. This document contains the official English version of EN 40-5:2000.

Swedish Standards corresponding to documents referred to in this Standard are listed in "Catalogue of Swedish Standards", issued by SIS. The Catalogue lists, with reference number and year of Swedish approval, International and European Standards approved as Swedish Standards as well as other Swedish Standards.

Belysningsstolpar – Del 5: Specifikation för belysningsstolpar av stål

Europastandarden EN 40-5:2000 gäller som svensk standard. Detta dokument innehåller den officiella engelska versionen av EN 40-5:2000.

Motsvarigheten och aktualiteten i svensk standard till de publikationer som omnämns i denna standard framgår av "Katalog över svensk standard", som ges ut av SIS. I katalogen redovisas internationella och europeiska standarder som fastställts som svenska standarder och övriga gällande svenska standarder.

ICS 93.080.40

Standarder kan beställas hos SIS Förlag AB som även lämnar allmänna upplysningar om svensk och utländsk standard.

English version

Lighting columns - Part 5: Specification for steel lighting columns

Candélabres d'éclairage public - Partie 5: Spécification
pour les candélabres d'éclairage public en acier

Lichtmaste - Teil 5: Regeln für Maste aus Stahl

This European Standard was approved by CEN on 16 July 1999.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Central Secretariat has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.

Foreword

This European Standard has been prepared by Technical Committee CEN/TC 50 "Lighting columns and spigots", the secretariat of which is held by BSI.

This European Standard replaces EN 40-5:1982, EN 40-3:1982 and EN 40-4:1982.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by October 2000, and conflicting national standards shall be withdrawn at the latest by October 2000.

This European Standard has been prepared under a mandate given to CEN by the European Commission and the European Free Trade Association, and supports essential requirements of EU Directive(s).

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and the United Kingdom.

This European Standard is the fifth in a series relating to specifications for lighting columns. There will be six parts to this Standard as follows:

Part 1: Definitions and terms

Part 2: General requirements and dimensions

Part 3: Design and verification

3-1 Specification for characteristic loads

3-2 Verification by testing

3-3 Verification by calculation

Part 4: Specifications for reinforced and prestressed concrete lighting columns

Part 5: Specifications for steel columns

Part 6: Specifications for aluminium columns

1 Scope

This European Standard specifies requirements for steel lighting columns. It includes materials and conformity control. It applies to post top columns not exceeding 20 m height for post top lanterns and to columns with brackets not exceeding 18 m height for side entry lanterns.

This European Standard specifies performance related to the essential requirement of resistance to horizontal (wind) loads, measured according to prEN 40-3. Passive safety and the behaviour of a column under the impact of a vehicle are not included in this standard. This group of lighting columns will have additional requirements (see prEN 40-2).

2 Normative references

This European Standard incorporates by dated or undated reference, provisions from other publications. These normative references are cited at the appropriate places in the text and the publications are listed hereafter. For dated references, subsequent amendments to or revisions of any of these publications apply to this European Standard only when incorporated in it by amendment or revision. For undated references the latest edition of the publication referred to applies.

EN 40-1	Lighting columns - Part 1: Definitions and terms
prEN 40-2:1999	Lighting columns - Part 2: General requirements and dimensions
EN 40-3-1	Lighting columns - Design and verification - Part 3-1: Specification for characteristic loads
EN 40-3-2	Lighting columns - Design and verification - Part 3-2: Verification by testing
prEN 40-3-3	Lighting columns - Design and verification - Part 3-3: Verification by calculation
EN 287-1	Approval testing of welders - Fusion welding - Part 1: Steels
EN 288-1	Specification and approval of welding procedures for metallic materials - Part 1: General rules for fusion welding
EN 288-2	Specification and approval of welding procedures for metallic materials - Part 2: Welding procedure specification for arc welding
EN 288-3	Specification and approval of welding procedures for metallic materials - Part 3: Welding procedure tests for arc welding of steels
EN 288-8	Specification and approval of welding procedures for metallic materials - Part 8: Approval by a pre-production welding test
EN 970	Non-destructive examination of fusion welds - Visual examination

EN 1011-1	Welding - Recommendations for welding of metallic materials - Part 1: General guidance for arc welding
prEN 1011-2	Welding - Recommendations for welding of metallic materials - Part 2: Arc welding of ferritic steels.
prEN 1011-3	Welding - Recommendations for welding of metallic materials - Part 3: Arc welding of stainless steels.
EN ISO 1461	Hot dip galvanized coatings on fabricated iron and steel articles - Specifications and test methods (ISO 1461:1999)
EN 10025	Hot rolled products of non-alloy structural steels - Technical delivery conditions (includes amendment A1:1993)
EN 10088	Stainless steels
EN 10149-1	Hot-rolled flat products made of high yield strength steels for cold forming - Part 1: General delivery conditions.
EN 10149-2	Hot-rolled flat products made of high yield strength steels for cold forming - Part 2: Delivery conditions for thermomechanically rolled steels.
EN 10204	Metallic products - Types of inspection documents
EN 10210	Hot finished structural hollow sections of non-alloy and fine grain structural steels
EN 10219	Cold formed structural hollow section of non-alloy and fine grain steels
EN 50102	Degrees of protection provided by enclosures for electrical equipment against external mechanical impacts (IK code)
ISO 2063	Metallic and other inorganic coatings - Thermal spraying - Zinc, aluminium and their alloys
ISO 8501-1	Preparation of steel substances before application of paints and related products - Visual assessment of surface cleanliness - Part 1: Rust grades and preparation grades of uncoated steel substrates and of steel substrates after overall removal of previous coatings.
ISO 9717	Phosphate conversion coatings for metals - Method of specifying requirements

3 Definitions

For the purposes of this standard, definitions given in EN 40-1 apply.

4 Materials

4.1 Steel

The steel used shall comply with one of the following standards, and be suitable for hot-dip galvanizing when such surface protection is required. Rimming steel shall not be used.

Steel sheet and plate:	EN 10025 except grade S185/ EN 10149-1 and EN 10149-2
Hot-finished steel tube:	EN 10210
Cold-formed steel tube:	EN 10219
Stainless steels:	EN 10088

4.2 Foundation bolts

The minimum mechanical properties of the steel used for foundation bolts shall comply with the requirements of EN 10025 grade S 235 JR.

5 Dimensions

Dimensions shall be in accordance with prEN 40-2.

6 Design and design verification

The column shall be designed to sustain safely the dead loads and the wind loads specified in accordance with EN 40-3-1.

The structural design of a lighting column shall be verified either by calculation in accordance with prEN 40-3-3 or by testing in accordance with EN 40-3-2.

7 Welding

7.1 Welding process

Arc welding of ferritic steels shall be in accordance with EN 1011-1 and prEN 1011-2.

Arc welding of stainless steels shall be in accordance with EN 1011-1 and prEN 1011-3.
