# Standarder får världen att fungera

*SIS (Swedish Standards Institute) är en fristående ideell förening med medlemmar från både privat och offentlig sektor. Vi är en del av det europeiska och globala nätverk som utarbetar internationella standarder. Standarder är dokumenterad kunskap utvecklad av framstående aktörer inom industri, näringsliv och samhälle och befrämjar handel över gränser, bidrar till att processer och produkter blir säkrare samt effektiviserar din verksamhet.*

## Delta och påverka

Som medlem i SIS har du möjlighet att påverka framtida standarder inom ditt område på nationell, europeisk och global nivå. Du får samtidigt tillgång till tidig information om utvecklingen inom din bransch.

## Ta del av det färdiga arbetet

Vi erbjuder våra kunder allt som rör standarder och deras tillämpning. Hos oss kan du köpa alla publikationer du behöver – allt från enskilda standarder, tekniska rapporter och standardpaket till handböcker och onlinetjänster. Genom vår webbtjänst e-nav får du tillgång till ett lättnavigerat bibliotek där alla standarder som är aktuella för ditt företag finns tillgängliga. Standarder och handböcker är källor till kunskap. Vi säljer dem.

## Utveckla din kompetens och lyckas bättre i ditt arbete

Hos SIS kan du gå öppna eller företagsinterna utbildningar kring innehåll och tillämpning av standarder. Genom vår närhet till den internationella utvecklingen och ISO får du rätt kunskap i rätt tid, direkt från källan. Med vår kunskap om standarders möjligheter hjälper vi våra kunder att skapa verklig nytta och lönsamhet i sina verksamheter.

**Vill du veta mer om SIS eller hur standarder kan effektivisera din verksamhet är du välkommen in på [www.sis.se](http://www.sis.se) eller ta kontakt med oss på tel 08-555 523 00.**

# Standards make the world go round

*SIS (Swedish Standards Institute) is an independent non-profit organisation with members from both the private and public sectors. We are part of the European and global network that draws up international standards. Standards consist of documented knowledge developed by prominent actors within the industry, business world and society. They promote cross-border trade, they help to make processes and products safer and they streamline your organisation.*

## Take part and have influence

As a member of SIS you will have the possibility to participate in standardization activities on national, European and global level. The membership in SIS will give you the opportunity to influence future standards and gain access to early stage information about developments within your field.

## Get to know the finished work

We offer our customers everything in connection with standards and their application. You can purchase all the publications you need from us - everything from individual standards, technical reports and standard packages through to manuals and online services. Our web service e-nav gives you access to an easy-to-navigate library where all standards that are relevant to your company are available. Standards and manuals are sources of knowledge. We sell them.

## Increase understanding and improve perception

With SIS you can undergo either shared or in-house training in the content and application of standards. Thanks to our proximity to international development and ISO you receive the right knowledge at the right time, direct from the source. With our knowledge about the potential of standards, we assist our customers in creating tangible benefit and profitability in their organisations.

**If you want to know more about SIS, or how standards can streamline your organisation, please visit [www.sis.se](http://www.sis.se) or contact us on phone +46 (0)8-555 523 00**

Europastandarden EN ISO 9454-2 gäller som svensk standard. Detta dokument innehåller den officiella engelska versionen av EN ISO 9454-2.

The European Standard EN ISO 9454-2 has the status of a Swedish Standard. This document contains the official English version of EN ISO 9454-2.

*Uppllysningar om sakinnehållet i standarden lämnas av SIS, Swedish Standards Institute, telefon 08-555 520 00. Standarder kan beställas hos SIS Förlag AB som även lämnar allmänna uppllysningar om svensk och utländsk standard.*

*Information about the content of the standard is available from the Swedish Standards Institute (SIS), telephone +46 8 555 520 00. Standards may be ordered from SIS Förlag AB, who can also provide general information about Swedish and foreign standards.*

Standarden är framtagen av kommittén för Svetsteknik, SIS/TK 134.

Har du synpunkter på innehållet i den här standarden, vill du delta i ett kommande revideringsarbete eller vara med och ta fram andra standarder inom området? Gå in på [www.sis.se](http://www.sis.se) - där hittar du mer information.

EUROPEAN STANDARD

**EN ISO 9454-2**

NORME EUROPÉENNE

EUROPÄISCHE NORM

April 2000

---

ICS 25.160.50

English version

**Soft soldering fluxes - Classification and requirements - Part 2:  
Performance requirements (ISO 9454-2:1998)**

Flux de brasage tendre - Classification et caractéristiques -  
Partie 2: Prescriptions de performance (ISO 9454-2:1998)

Flußmittel zum Weichlöten - Einteilung und Anforderungen -  
Teil 2: Eignungsanforderungen (ISO 9454-2:1998)

This European Standard was approved by CEN on 10 March 2000.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Central Secretariat has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.

## Foreword

ISO (the International Standards Organization) is a worldwide federation of national standards bodies (ISO members). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 9454-2 was prepared by Technical Committee ISO/TC 44, *Welding and allied processes*, subcommittee SC12, *Soldering and brazing materials*

ISO 9454 consists of the following parts, under the general title *Soft soldering fluxes — Classification and requirements*:

- *Part 1: Classification, labelling and packaging*
- *Part 2: Performance requirements*

Annex A of this part of ISO 9454 is for information only.

## **Introduction**

Fluxes assist molten solder to wet metals surfaces to be joined by removing oxides and related contaminants from the solder and surfaces of the parts during soldering. Fluxes also protect surfaces from oxidization and assist wetting of the base metals by molten solder.

Care is necessary when selecting a flux for a particular application, in order to ensure an adequate service life of the assembly. Factors such as the ease of residue removal, corrosiveness, possible health and safety hazards and the efficacy of the flux, should all be considered when making the choice.

# Soft soldering fluxes — Classification and requirements —

## Part 2: Performance requirements

### 1 Scope

This part of ISO 9454 specifies the performance requirements for fluxes in solid, liquid and paste forms intended for use with soft solders.

#### NOTES

- 1 ISO 9454-1 specifies the requirements for labelling and packaging as well as the coding system for the classification of the fluxes.
- 2 Some of the fluxes intended for inert gas and vapour phase soldering may not pass some of the criteria in tables 1 and 2. Requirements for these fluxes should be agreed between the purchaser and the supplier.

### 2 Normative references

The following standards contain provisions which, through reference in this text, constitute provisions of this International Standard. At the time of publication, the editions indicated were valid. All standards are subject to revision, and parties to agreements based on this International Standard are encouraged to investigate the possibility of applying the most recent editions of the standards indicated below. Members of IEC and ISO maintain registers of currently valid International Standards.

ISO 9454-1:1990, *Soft soldering fluxes — Classification and requirements — Part 1: Classification, labelling and packaging.*

ISO 9455-1:1990, *Soft soldering fluxes — Test methods — Part 1: Determination of non-volatile matter, gravimetric method.*

ISO 9455-2:1993, *Soft soldering fluxes — Test methods — Part 2: Determination of non-volatile matter, ebulliometric method.*

ISO 9455-3:1992, *Soft soldering fluxes — Test methods — Part 3: Determination of acid value, potentiometric and visual titration methods.*

ISO 9455-5:1992, *Soft soldering fluxes — Test methods — Part 5: Copper mirror test.*

ISO 9455-6:1995, *Soft soldering fluxes — Test methods — Part 6: Determination and detection of halide (excluding fluoride) content.*

ISO 9455-8:1991, *Soft soldering fluxes — Test methods — Part 8: Determination of zinc content.*

ISO 9455-9:1993, *Soft soldering fluxes — Test methods — Part 9: Determination of ammonia content.*

ISO 9455-10:1998, *Soft soldering fluxes — Test methods — Part 10: Flux efficacy tests, solder spread method.*

ISO 9455-11:1991, *Soft soldering fluxes — Test methods — Part 11: Solubility of flux residues.*

ISO 9455-12:1992, *Soft soldering fluxes — Test methods — Part 12: Steel tube corrosion test.*

ISO 9455-13:1996, *Soft soldering fluxes — Test methods — Part 13: Determination of flux spattering.*

ISO 9455-14:1991, *Soft soldering fluxes — Test methods — Part 14: Assessment of tackiness of flux residues.*

ISO 9455-15:1996, *Soft soldering fluxes — Test methods — Part 15: Copper corrosion test.*

ISO 9455-16:—<sup>1)</sup>, *Soft soldering fluxes — Test methods — Part 16: Flux efficacy tests, wetting balance method.*

ISO 9455-17:—<sup>1)</sup>, *Soft soldering fluxes — Test methods — Part 17: Surface insulation resistance, comb test and electrochemical migration test of flux residues.*

### 3 Definitions

For the purposes of this part of ISO 9454, the following definitions apply.

#### 3.1

##### **flux**

chemical substance in a form which assists molten solder to wet metal surfaces to be joined, by removing oxides and related contaminants from the solder and from the surfaces of the parts during soldering

NOTE — Flux may be in solid, liquid or paste form.

#### 3.2

##### **liquid flux**

solution of a flux in a suitable liquid solvent

#### 3.3

##### **paste flux**

solution or uniform dispersion of flux in a suitable viscous medium

#### 3.4

##### **colophony (rosin)**

hard, natural resin, extracted from the oleoresin of pine trees and refined, consisting of abietic and pimaric acids and their isomers, some organic fatty acids and terpene hydrocarbons

NOTE — These natural rosins, or modified rosins, should give a positive reaction to the Liebermann and Storch test <sup>[1]</sup> and shall have an acid value greater than 155 mg KOH/g.

#### 3.5

##### **resin**

general, non-specific, widely accepted term for natural and synthetic resinous products

#### 3.6

##### **activator**

substance which increases the chemical reactivity of a flux

#### 3.7

##### **organic type flux**

flux which is based on non-rosin organic substances

#### 3.8

##### **inorganic type flux**

flux containing inorganic acids or alkalis, or their salts.

### 4 Flux condition

Solid fluxes shall be of uniform composition and be free from foreign matter or impurities deleterious to the fluxing action.

---

1) To be published.

Liquid fluxes shall be homogeneous and free from sediment.

Paste fluxes shall be of a uniform viscous form and of a consistency suitable for application to the surface to be soldered.

## **5 Performance requirements for fluxes**

When tested in accordance with the appropriate test methods given in the various parts of ISO 9455, fluxes shall comply with the requirements given in tables 1 to 3.

When determining the acid value for type 2 fluxes in accordance with ISO 9455-3:1992, the value for *S* in 3.5 of the method is to be taken as 100.

NOTE — It should be noted that, because of the difference between the chemicals in flux types 1 and 2, the values for acid value (see ISO 9455-3), and for halide content (see ISO 9455-6), are expressed on different bases and are not, therefore, comparable.
