

**Termisk sprutning – Acceptansk kontroll av
utrustning för termisk sprutning –
Del 3: Bågsprutning**

**Thermal spraying – Acceptance inspection of
thermal spraying equipment –
Part 3: Arc spraying**

Europastandarden EN 1395-3:2007 gäller som svensk standard. Detta dokument innehåller den officiella engelska versionen av EN 1395-3:2007.

The European Standard EN 1395-3:2007 has the status of a Swedish Standard. This document contains the official English version of EN 1395-3:2007.

Upplýsingar om **sakinnehållet** i standarden lämnas av SIS, Swedish Standards Institute, telefon 08 - 555 520 00.

Standarder kan beställas hos SIS Förlag AB som även lämnar **allmänna upplýsingar** om svensk och utländsk standard.

EUROPEAN STANDARD

EN 1395-3

NORME EUROPÉENNE

EUROPÄISCHE NORM

January 2007

ICS 25.220.20

Supersedes EN 1395:1996

English Version

Thermal spraying - Acceptance inspection of thermal spraying equipment - Part 3: Arc spraying

Projection thermique - Contrôle d'acceptation du matériel
de projection thermique - Partie 3: Projection à l'arc

Thermisches Spritzen - Abnahmeprüfungen für Anlagen
zum thermischen Spritzen - Teil 3: Lichtbogenspritzen

This European Standard was approved by CEN on 23 December 2006.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.

Foreword

This document (EN 1395-3:2007) has been prepared by Technical Committee CEN/TC 240 “Thermal spraying and thermally sprayed coatings”, the secretariat of which is held by DIN.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by July 2007, and conflicting national standards shall be withdrawn at the latest by July 2007.

This document together with EN 1395-1, 1395-2, 1395-4, 1395-5, 1395-6 and 1395-7 supersedes EN 1395:1996.

EN 1395 consists of the following Parts, under the general title *Thermal spraying — Acceptance inspection of thermal spraying equipment*:

- *Part 1: General requirements;*
- *Part 2: Flame spraying including HVOF;*
- *Part 3: Arc spraying;*
- *Part 4: Plasma spraying;*
- *Part 5: Plasma spraying in chambers;*
- *Part 6: Manipulator systems;*
- *Part 7: Powder feed systems.*

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.

EN 1395-3:2007 (E)

1 Scope

This European Standard specifies requirements for the acceptance inspection of thermal spraying equipment, in this case arc spraying, used to produce thermally sprayed coatings of reproducible quality.

This part should be used in conjunction with EN 1395-1, which includes general requirements and explanations of procedures.

2 Normative references

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

EN 657:2005, *Thermal spraying — Terminology, classification*

EN ISO 14919:2001, *Thermal spraying — Wires, rods and cords for flame and arc spraying — Classification — Technical supply conditions (ISO 14919:2001)*

3 Terms and definitions

For the purposes of this document, the terms and definitions given in EN 657:2005 apply.

4 Principles of acceptance inspection

4.1 General

The following clauses reveal state of the art technology in thermal spraying equipment and the minimum requirements concerning a stable parameter setting and maintenance as given in Annex A.

4.2 Atomising gas

The atomising gas hoses and the control device shall be designed in such a manner that an undisturbed operation is ensured.

4.3 Arc spraying nozzle

The nozzle system (contact tubes and air nozzle) shall permit a constant arc to be maintained and provide atomisation without causing deposits that might disturb the operation.

4.4 Spraying wire feed unit

A continuously controllable and reproducible feed of the wires shall be provided. A precondition for this is an adequate constant air pressure and supply of electrical power.
