Standarder får världen att fungera

SIS (Swedish Standards Institute) är en fristående ideell förening med medlemmar från både privat och offentlig sektor. Vi är en del av det europeiska och globala nätverk som utarbetar internationella standarder. Standarder är dokumenterad kunskap utvecklad av framstående aktörer inom industri, näringsliv och samhälle och befrämjar handel över gränser, bidrar till att processer och produkter blir säkrare samt effektiviserar din verksamhet.

Delta och påverka

Som medlem i SIS har du möjlighet att påverka framtida standarder inom ditt område på nationell, europeisk och global nivå. Du får samtidigt tillgång till tidig information om utvecklingen inom din bransch.

Ta del av det färdiga arbetet

Vi erbjuder våra kunder allt som rör standarder och deras tillämpning. Hos oss kan du köpa alla publikationer du behöver – allt från enskilda standarder, tekniska rapporter och standardpaket till handböcker och onlinetjänster. Genom vår webbtjänst e-nav får du tillgång till ett lättnavigerat bibliotek där alla standarder som är aktuella för ditt företag finns tillgängliga. Standarder och handböcker är källor till kunskap. Vi säljer dem.

Utveckla din kompetens och lyckas bättre i ditt arbete

Hos SIS kan du gå öppna eller företagsinterna utbildningar kring innehåll och tillämpning av standarder. Genom vår närhet till den internationella utvecklingen och ISO får du rätt kunskap i rätt tid, direkt från källan. Med vår kunskap om standarders möjligheter hjälper vi våra kunder att skapa verklig nytta och lönsamhet i sina verksamheter.

Vill du veta mer om SIS eller hur standarder kan effektivisera din verksamhet är du välkommen in på www.sis.se eller ta kontakt med oss på tel 08-555 523 00.

Standards make the world go round

SIS (Swedish Standards Institute) is an independent non-profit organisation with members from both the private and public sectors. We are part of the European and global network that draws up international standards. Standards consist of documented knowledge developed by prominent actors within the industry, business world and society. They promote cross-border trade, they help to make processes and products safer and they streamline your organisation.

Take part and have influence

As a member of SIS you will have the possibility to participate in standardization activities on national, European and global level. The membership in SIS will give you the opportunity to influence future standards and gain access to early stage information about developments within your field.

Get to know the finished work

We offer our customers everything in connection with standards and their application. You can purchase all the publications you need from us - everything from individual standards, technical reports and standard packages through to manuals and online services. Our web service e-nav gives you access to an easy-to-navigate library where all standards that are relevant to your company are available. Standards and manuals are sources of knowledge. We sell them.

Increase understanding and improve perception

With SIS you can undergo either shared or in-house training in the content and application of standards. Thanks to our proximity to international development and ISO you receive the right knowledge at the right time, direct from the source. With our knowledge about the potential of standards, we assist our customers in creating tangible benefit and profitability in their organisations.

If you want to know more about SIS, or how standards can streamline your organisation, please visit www.sis.se or contact us on phone +46 (0)8-555 523 00

Den internationella standarden ISO 11873:2005 gäller som svensk standard. Detta dokument innehåller den officiella engelska versionen av ISO 11873:2005.

I denna standard är det korrigerande dokumentet SS-ISO 11873:2010/Cor 1:2010 bifogat.

The International Standard ISO 11873:2005 has the status of a Swedish Standard. This document contains the official English version of ISO 11873:2005.

In this standard is the correction SS-ISO 11873:2010/Cor 1:2010 attached.

© Copyright/Upphovsrätten till denna produkt tillhör SIS, Swedish Standards Institute, Stockholm, Sverige. Användningen av denna produkt regleras av slutanvändarlicensen som återfinns i denna produkt, se standardens sista sidor.

© Copyright SIS, Swedish Standards Institute, Stockholm, Sweden. All rights reserved. The use of this product is governed by the end-user licence for this product. You will find the licence in the end of this document.

Upplysningar om sakinnehållet i standarden lämnas av SIS, Swedish Standards Institute, telefon 08-555 520 00. Standarder kan beställas hos SIS Förlag AB som även lämnar allmänna upplysningar om svensk och utländsk standard.

Information about the content of the standard is available from the Swedish Standards Institute (SIS), telephone +46 8 555 520 00. Standards may be ordered from SIS Förlag AB, who can also provide general information about Swedish and foreign standards.

Standarden är framtagen av kommittén för Pulvermetallurgi, SIS/TK 133.

Har du synpunkter på innehållet i den här standarden, vill du delta i ett kommande revideringsarbete eller vara med och ta fram andra standarder inom området? Gå in på www.sis.se - där hittar du mer information.

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 11873 was prepared by Technical Committee ISO/TC 119, *Powder metallurgy*, Subcommittee SC 4, *Sampling and testing methods for hardmetals*.

Hardmetals — Determination of sulfur and carbon contents in cobalt metal powders — Infrared detection method

1 Scope

This International Standard specifies the method to be used for the determination of sulfur and carbon in cobalt metal powders in the range of 0,001 % (*m/m*) to 0,1 % (*m/m*) by combustion in oxygen and infrared (IR)-detection of carbon dioxide (CO₂) and sulfur dioxide (SO₂).

2 Normative references

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

ISO 5725 (all parts), *Accuracy (trueness and precision) of measurement methods and results*

3 Reagents

Reagents of the highest purity shall be used.

3.1 Oxygen, purity according to the specification of the supplier.

3.2 Tungsten granules, or an equivalent shape or form of tungsten as a combustion aid. The particle size shall not be less than 0,2 mm.

3.3 Iron chips, as required for combustion.

4 Procedure

4.1 Test portion

Weigh, to the nearest 0,001 g, 0,5 g to 1,5 g of the sample into a suitable crucible. The mass is dependent on the carbon and sulfur content. There may be a risk of contamination if samples/materials are stored in plastic containers.

4.2 Analysis

Add the combustion aid (3.2 and 3.3) and carry out the analysis according to the instructions of the manufacturer.

4.3 Calibration

Perform at least three blank tests with a crucible and combustion aid (3.2 and 3.3). Proceed if the blank values are within the specification of the instrument manufacturer. Perform at least three calibration tests with reference materials.

5 Expression of the results

5.1 Calculation

Calculate the mass fraction of sulfur, w_S , or carbon, w_C , expressed as a percentage, using the following formulae:

$$w_S = \frac{(m_S - B) \times P \times 100}{M}$$

$$w_C = \frac{(m_C - B) \times P \times 100}{M}$$

where

m_S is the mass, in grams, of sulfur determined in the test portion;

m_C is the mass, in grams, of carbon determined in the test portion;

P is the calibration factor;

m is the mass, in grams, of the test portion;

B is the average blank value (see 4.3).

5.2 Permissible tolerances

The repeatability standard deviations between three independent determinations shall not exceed the following values:

	Lower limit	Upper limit
C	0,005 0 % (<i>m/m</i>) ± 50 %	0,200 0 % (<i>m/m</i>) ± 10 %
S	0,005 0 % (<i>m/m</i>) ± 50 %	0,200 0 % (<i>m/m</i>) ± 10 %

5.3 Final result

Report the arithmetical mean of acceptable determinations of mass fractions rounded to 0,001 %.

6 Test report

The test report shall include the following information:

- a reference to this International Standard;
- all details necessary for identification of the test sample;
- the test results obtained;
- all operations not specified by this International Standard, or regarded as optional;
- details of any occurrence which may have affected the result.
