**Conservation of cultural heritage – Surface protection for porous inorganic materials – Technical and chemical data sheets of water repellent product**

# Standarder får världen att fungera

*SIS (Swedish Standards Institute) är en fristående ideell förening med medlemmar från både privat och offentlig sektor. Vi är en del av det europeiska och globala nätverk som utarbetar internationella standarder. Standarder är dokumenterad kunskap utvecklad av framstående aktörer inom industri, näringsliv och samhälle och befrämjar handel över gränser, bidrar till att processer och produkter blir säkrare samt effektiviserar din verksamhet.*

## Delta och påverka

Som medlem i SIS har du möjlighet att påverka framtida standarder inom ditt område på nationell, europeisk och global nivå. Du får samtidigt tillgång till tidig information om utvecklingen inom din bransch.

## Ta del av det färdiga arbetet

Vi erbjuder våra kunder allt som rör standarder och deras tillämpning. Hos oss kan du köpa alla publikationer du behöver – allt från enskilda standarder, tekniska rapporter och standardpaket till handböcker och onlinetjänster. Genom vår webbtjänst e-nav får du tillgång till ett lättnavigerat bibliotek där alla standarder som är aktuella för ditt företag finns tillgängliga. Standarder och handböcker är källor till kunskap. Vi säljer dem.

## Utveckla din kompetens och lyckas bättre i ditt arbete

Hos SIS kan du gå öppna eller företagsinterna utbildningar kring innehåll och tillämpning av standarder. Genom vår närhet till den internationella utvecklingen och ISO får du rätt kunskap i rätt tid, direkt från källan. Med vår kunskap om standarders möjligheter hjälper vi våra kunder att skapa verklig nytta och lönsamhet i sina verksamheter.

**Vill du veta mer om SIS eller hur standarder kan effektivisera din verksamhet är du välkommen in på [www.sis.se](http://www.sis.se) eller ta kontakt med oss på tel 08-555 523 00.**

# Standards make the world go round

*SIS (Swedish Standards Institute) is an independent non-profit organisation with members from both the private and public sectors. We are part of the European and global network that draws up international standards. Standards consist of documented knowledge developed by prominent actors within the industry, business world and society. They promote cross-border trade, they help to make processes and products safer and they streamline your organisation.*

## Take part and have influence

As a member of SIS you will have the possibility to participate in standardization activities on national, European and global level. The membership in SIS will give you the opportunity to influence future standards and gain access to early stage information about developments within your field.

## Get to know the finished work

We offer our customers everything in connection with standards and their application. You can purchase all the publications you need from us - everything from individual standards, technical reports and standard packages through to manuals and online services. Our web service e-nav gives you access to an easy-to-navigate library where all standards that are relevant to your company are available. Standards and manuals are sources of knowledge. We sell them.

## Increase understanding and improve perception

With SIS you can undergo either shared or in-house training in the content and application of standards. Thanks to our proximity to international development and ISO you receive the right knowledge at the right time, direct from the source. With our knowledge about the potential of standards, we assist our customers in creating tangible benefit and profitability in their organisations.

**If you want to know more about SIS, or how standards can streamline your organisation, please visit [www.sis.se](http://www.sis.se) or contact us on phone +46 (0)8-555 523 00**

Europastandarden EN 17114:2018 gäller som svensk standard. Detta dokument innehåller den officiella engelska versionen av EN 17114:2018.

The European Standard EN 17114:2018 has the status of a Swedish Standard. This document contains the official version of EN 17114:2018.

*Upplysningar om sakinnehållet i standarden lämnas av SIS, Swedish Standards Institute, telefon 08-555 520 00. Standarder kan beställas hos SIS som även lämnar allmänna upplysningar om svensk och utländsk standard.*

*Information about the content of the standard is available from the Swedish Standards Institute (SIS), telephone +46 8 555 520 00. Standards may be ordered from SIS, who can also provide general information about Swedish and foreign standards.*

Denna standard är framtagen av kommittén för Bevarande av kulturarv, SIS/TK 479.

Har du synpunkter på innehållet i den här standarden, vill du delta i ett kommande revideringsarbete eller vara med och ta fram andra standarder inom området? Gå in på [www.sis.se](http://www.sis.se) - där hittar du mer information.

EUROPEAN STANDARD

EN 17114

NORME EUROPÉENNE

EUROPÄISCHE NORM

November 2018

ICS 97.195

English Version

## Conservation of cultural heritage - Surface protection for porous inorganic materials - Technical and chemical data sheets of water repellent product

Conservation du patrimoine culturel - Protection de surface des matériaux inorganiques poreux - Fiches de données techniques et chimiques des produits hydrofuges

Erhaltung des kulturellen Erbes - Oberflächenschutz für poröse anorganische Materialien - Technische und chemische Datenblätter von wasserabweisenden Produkten

This European Standard was approved by CEN on 15 July 2018.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

## European foreword

This document (EN 17114:2018) has been prepared by Technical Committee CEN/TC 346 "Conservation of Cultural Heritage", the secretariat of which is held by UNI.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by May 2019 and conflicting national standards shall be withdrawn at the latest by May 2019.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN shall not be held responsible for identifying any or all such patent rights.

This document calls for the use of substances and/or procedures that can be injurious to health and harmful for the environment if adequate precautions are not taken. It refers only to technical suitability and this not absolves the user from legal obligations relating to health and safety at any stage.

According to the CEN-CENELEC Internal Regulations, the national standards organisations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

## SS-EN 17114:2018 (E)

### Introduction

This document indicates the chemical and physical characteristics, properties and performance meant to be reported in the technical data sheet of a water repellent product used for conservation work on porous inorganic materials in the field of Cultural Heritage.

The products covered by this standard are usually applied in a liquid state with the aim of imparting hydrophobic properties to the material on which they are applied. Some products also have additional functions (e.g. superficial consolidation, anti-graffiti, biocidal action, etc.).

The main goal of a water repellent is to reduce the penetration of water and aqueous solutions into porous material by modifying surface properties both externally and within the near surface area.

According to EN 16581, a water repellent should fulfil the following requirements:

- a) reduce the absorption of liquid water into the material;
- b) cause minimum change of water vapour permeability of the material;
- c) cause minimum change in colour and gloss of the material;
- d) produce no harmful by-products after application;
- e) maintain its physical and chemical stability.

It is recommended to read the relevant safety data sheets on the occupational and health hazards of the main chemical constituents of the products before using them.

The manufacturer should also provide safety data sheets.

## 1 Scope

This document specifies the information contained in the technical data sheet of the product in order to allow a preliminary selection of the most suitable products to use in a specific case of intervention.

## 2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

EN 15801, *Conservation of cultural property - Test methods - Determination of water absorption by capillarity*

EN 15802, *Conservation of cultural property - Test methods - Determination of static contact angle*

EN 15803, *Conservation of cultural property - Test methods - Determination of water vapour permeability ( $\delta p$ )*

EN 15886, *Conservation of cultural property - Test methods - Colour measurement of surfaces*

EN 16302, *Conservation of cultural heritage - Test methods - Measurement of water absorption by pipe method*

EN 16322, *Conservation of Cultural Heritage - Test methods - Determination of drying properties*

EN 16581, *Conservation of Cultural Heritage - Surface protection for porous inorganic materials - Laboratory test methods for the evaluation of the performance of water repellent products*

EN 17036, *Conservation of Cultural Heritage - Artificial ageing by simulated solar radiation of the surface of untreated or treated porous inorganic materials*

## 3 Terms and definitions

For the purposes of this document, the following terms and definitions apply.

ISO and IEC maintain terminological databases for use in standardization at the following addresses:

- IEC Electropedia: available at <http://www.electropedia.org/>
- ISO Online browsing platform: available at <http://www.iso.org/obp>

### 3.1

#### **porous inorganic material**

material including natural stones, e.g. sandstone, limestone, marble, granites, gneiss, as well as artificial materials, such as mortar, plaster, gypsum, ceramics, brick and others

[SOURCE: EN 15801:2009, 3.1]

### 3.2

#### **dry product**

water repellent chemical present in the material in its final form; after the completion of the reactions / transformations (solvent evaporation, polymerization, cross-linking, etc.) leading to the development of water resistant characteristics

## SS-EN 17114:2018 (E)

### 3.3 solution

clear monophasic system in the liquid state consisting of a solute uniformly distributed in a solvent

### 3.4 suspension

heterogeneous mixture of materials comprising a liquid and a finely dispersed solid material

[SOURCE: EN ISO 4618:2014, 2.246]

Note 1 to entry: Generally, it is cloudy and can have a solid residue in function of the quantity and size of the particles.

Note 2 to entry: It can contain additives to stabilize the system.

### 3.5 emulsion

finely dispersed mixture of at least two liquids which are insoluble, or only sparingly soluble, in each other

[SOURCE: EN ISO 4618:2014, 2.97]

## 4 Symbols and abbreviations

AC	capillary water absorption coefficient, in $\text{kg}/(\text{m}^2 \cdot \text{s}^{1/2})$ ;
$\delta_p$	water vapour permeability, in $\text{kg}/(\text{m} \cdot \text{s} \cdot \text{Pa})$ ;
$\delta_{p\text{ at}}$	water vapour permeability after treatment, in $\text{kg}/(\text{m} \cdot \text{s} \cdot \text{Pa})$ ;
$\delta_{p\text{ bt}}$	water vapour permeability before treatment, in $\text{kg}/(\text{m} \cdot \text{s} \cdot \text{Pa})$ ;
$L^*$	lightness coordinate. The scale for $L^*$ ranges from 0 (black) to 100 (white);
$a^*$	red/green coordinate, with $+a^*$ indicating redness and $-a^*$ indicating greenness;
$b^*$	yellow/blue coordinate, with $+b^*$ indicating yellowness and $-b^*$ indicating blueness;
$D$	drying rate, in $\text{kg}/(\text{m}^2 \cdot \text{h})$
$D_{1\text{ at}}$	drying rate corresponding to the first drying phase after the treatment, in $\text{kg}/(\text{m}^2 \cdot \text{h})$
$D_{1\text{ bt}}$	drying rate corresponding to the first drying phase before the treatment in $\text{kg}/(\text{m}^2 \cdot \text{h})$
$W_t$	amount of absorbed water at low pressure, in $\text{ml}/\text{cm}^2$
$H_e$	total radiant exposure, in $\text{MJ}/\text{m}^2$
RH	relative humidity
FTIR	Fourier Transform Infrared Spectroscopy
SEM	Scanning Electron Microscopy
OM	Optical Microscopy
NMR	Nuclear Magnetic Resonance

## 5 Data required to be reported in the technical data sheet

### 5.1 Product identification

The following data or information should be reported, if applicable.

- 5.1.1 Product trade name.
- 5.1.2 Manufacturer.
- 5.1.3 Distribution company.
- 5.1.4 Primary Function; Hydrophobic.

Any additional functionality:

- consolidating
- anti graffiti
- biocide
- other (specify).....

5.1.5 Physical state:

- liquid with no other substances
- solution (solute and solvent)
- suspension (solid particle suspended in fluid)
- emulsion (liquid droplets suspended in fluid)
- solid (e.g. powder, flakes, pellets, etc.)
- other (specify).....

### 5.2 Chemical and physical properties of the product

#### 5.2.1 General

The following data or information should be reported, if applicable.

- The product is supplied ready to use
- further preparation is required for application
- expiration date

Information shall be supplied as described in 5.2.2 to 5.2.6 and/or 5.3.
