# Standarder får världen att fungera

*SIS (Swedish Standards Institute) är en fristående ideell förening med medlemmar från både privat och offentlig sektor. Vi är en del av det europeiska och globala nätverk som utarbetar internationella standarder. Standarder är dokumenterad kunskap utvecklad av framstående aktörer inom industri, näringsliv och samhälle och befrämjar handel över gränser, bidrar till att processer och produkter blir säkrare samt effektiviserar din verksamhet.*

## Delta och påverka

Som medlem i SIS har du möjlighet att påverka framtida standarder inom ditt område på nationell, europeisk och global nivå. Du får samtidigt tillgång till tidig information om utvecklingen inom din bransch.

## Ta del av det färdiga arbetet

Vi erbjuder våra kunder allt som rör standarder och deras tillämpning. Hos oss kan du köpa alla publikationer du behöver – allt från enskilda standarder, tekniska rapporter och standardpaket till handböcker och onlinetjänster. Genom vår webbtjänst e-nav får du tillgång till ett lättnavigerat bibliotek där alla standarder som är aktuella för ditt företag finns tillgängliga. Standarder och handböcker är källor till kunskap. Vi säljer dem.

## Utveckla din kompetens och lyckas bättre i ditt arbete

Hos SIS kan du gå öppna eller företagsinterna utbildningar kring innehåll och tillämpning av standarder. Genom vår närhet till den internationella utvecklingen och ISO får du rätt kunskap i rätt tid, direkt från källan. Med vår kunskap om standarders möjligheter hjälper vi våra kunder att skapa verklig nytta och lönsamhet i sina verksamheter.

**Vill du veta mer om SIS eller hur standarder kan effektivisera din verksamhet är du välkommen in på [www.sis.se](http://www.sis.se) eller ta kontakt med oss på tel 08-555 523 00.**

# Standards make the world go round

*SIS (Swedish Standards Institute) is an independent non-profit organisation with members from both the private and public sectors. We are part of the European and global network that draws up international standards. Standards consist of documented knowledge developed by prominent actors within the industry, business world and society. They promote cross-border trade, they help to make processes and products safer and they streamline your organisation.*

## Take part and have influence

As a member of SIS you will have the possibility to participate in standardization activities on national, European and global level. The membership in SIS will give you the opportunity to influence future standards and gain access to early stage information about developments within your field.

## Get to know the finished work

We offer our customers everything in connection with standards and their application. You can purchase all the publications you need from us - everything from individual standards, technical reports and standard packages through to manuals and online services. Our web service e-nav gives you access to an easy-to-navigate library where all standards that are relevant to your company are available. Standards and manuals are sources of knowledge. We sell them.

## Increase understanding and improve perception

With SIS you can undergo either shared or in-house training in the content and application of standards. Thanks to our proximity to international development and ISO you receive the right knowledge at the right time, direct from the source. With our knowledge about the potential of standards, we assist our customers in creating tangible benefit and profitability in their organisations.

**If you want to know more about SIS, or how standards can streamline your organisation, please visit [www.sis.se](http://www.sis.se) or contact us on phone +46 (0)8-555 523 00**

Europastandarden EN 15288-2:2018 gäller som svensk standard. Detta dokument innehåller den officiella engelska versionen av EN 15288-2:2018.

Denna standard ersätter SS-EN 15288-2:2008, utgåva 1.

The European Standard EN 15288-2:2018 has the status of a Swedish Standard. This document contains the official version of EN 15288-2:2018.

This standard supersedes the SS-EN 15288-2:2008, edition 1.

EUROPEAN STANDARD

EN 15288-2

NORME EUROPÉENNE

EUROPÄISCHE NORM

December 2018

ICS 97.220.10

Supersedes EN 15288-2:2008

English Version

## Swimming pools for public use - Part 2: Safety requirements for operation

Piscines - Partie 2: Exigences de sécurité pour le fonctionnement

Schwimmbäder - Teil 2: Sicherheitstechnische Anforderungen an den Betrieb

This European Standard was approved by CEN on 10 September 2018.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

## European foreword

This document (EN 15288-2:2018) has been prepared by Technical Committee CEN/TC 136 “Sports, playground and other recreational facilities and equipment”, the secretariat of which is held by DIN.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by June 2019, and conflicting national standards shall be withdrawn at the latest by June 2019.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN shall not be held responsible for identifying any or all such patent rights.

This document will supersede EN 15288-2:2008.

In relation to EN 15288-2:2008 the following main amendments have been made:

- a) introduction has been revised;
- b) scope has been revised by excluding EN 16582;
- c) normative references have been updated;
- d) definition “Indoor swimming pools” has been revised;
- e) definition “therapeutic pool” has been revised;
- f) definition “As Low As Reasonably Practicable” has been added;
- g) definition “harm” has been added;
- h) definition “hazard” has been added;
- i) definition “risk” has been added;
- j) definition “risk estimation” has been added;
- k) definition “risk analysis” has been added;
- l) definition “risk evaluation” has been added;
- m) definition “risk assessment” has been added;
- n) classification Type 3 pools has been revised;
- o) organizational and operational requirements have been fully revised;
- p) new table “Special risk factors and possible solutions to reduce the risk with reference to As Low As Reasonably Practicable” has been added;
- q) emergency plan has been added;
- r) new Clause “Verification of safety measures and / or protective measures” has been added;

## SS-EN 15288-2:2018 (E)

- s) Annex A “Dye test” has been moved to EN 15288-1;
- t) new Annex A “List of possible hazards” has been added;
- u) new Annex B “Risk assessment” has been added;
- v) new Annex C “Model of risk assessment” has been added;
- w) wording aligned with EN 15288-1;
- x) Bibliography has been updated.

This standard series EN 15288 “*Swimming pools for public use*” consists of the following parts:

- *Part 1: Safety requirements for design*
- *Part 2: Safety requirements for operation*

According to the CEN-CENELEC Internal Regulations, the national standards organisations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

## Introduction

This standard has been prepared principally to provide a reliable basis regarding operational characteristics of a public swimming pool.

The standard provides a framework for enhancing consumer protection and confidence by identifying hazards and putting controls in place to manage them, demonstrating compliance to customers and suppliers. The standard can reduce swimming pool accidents and illnesses to cut related costs and reduce the risk of prosecution and litigation. The standard can act to achieve cost savings, efficiencies and compatibility of pools throughout Europe. The use of this standard can engage and motivate staff with better, safer working conditions. Finally, this standard can be used to support public policy objectives and, where appropriate, offer an effective alternative to regulation.

This standard provides a means of review and assessment of the hazards associated with public swimming pools; their monitoring and assessment; and activities available for their control through education of users, and good operation and management. The standard includes both specific guideline values and good practices. It addresses a wide range of types of hazard, including hazards leading to drowning and injury, water quality, contamination of associated facilities and air quality. The intention of this standard is to provide a structured and methodical approach to meeting the needs of swimming pool safety.

It lists the main hazards, gives ways in which these may be addressed, and states what actions a pool operator should take to attain the standard.

It is not intended that this standard should be used as a method of carrying out a risk assessment. Adopting and following this standard will undoubtedly assist in the carrying out of a risk assessment. And for completeness, the principles of a risk assessment are described in Annex B and a model risk assessment for a swimming pool is given in Annex C. Pools come in a wide range of types, from water parks with thousands of visitors per day, through to communal pools, hotel pools, campsite pools and pools at guest houses, where bather loads may be much lower. Such a wide range implies a gradation of the safety requirements, which take into account the specific level of hazard. It should also be considered that in type 1 swimming pools the user would expect poolside supervision to be provided, while in other types, the user would not expect it.

This standard is concerned with swimming pool safety and recognizes the ISO guidance on safety thresholds that describe safety as freedom from unacceptable risk (e.g. CEN/ISO TR 20183). Safety is achieved by reducing risk to a tolerable level. There is no complete absence of risk. In turn, there is no product or system that is without some risk, which should be reduced to a tolerable risk.

Pool operators should also consider EN 15288-1, as well as other European standards, national standards and regulations when using this document.

This European Standard includes requirements, recommendations and notes for all existing pools and new pools. While compliance with requirements is mandatory to fulfil this standard, recommendations indicate best practices and notes give additional information and / or explanations.
