Klättrväggar i anslutning till vatten i offentliga badanläggningar – Krav på säkerhet och drift

**Climbing/bouldering walls for use in the water area of swimming
pools of public use – Safety and operational requirements**

Standarder får världen att fungera

SIS (Swedish Standards Institute) är en fristående ideell förening med medlemmar från både privat och offentlig sektor. Vi är en del av det europeiska och globala nätverk som utarbetar internationella standarder. Standarder är dokumenterad kunskap utvecklad av framstående aktörer inom industri, näringsliv och samhälle och befrämjar handel över gränser, bidrar till att processer och produkter blir säkrare samt effektiviserar din verksamhet.

Delta och påverka

Som medlem i SIS har du möjlighet att påverka framtida standarder inom ditt område på nationell, europeisk och global nivå. Du får samtidigt tillgång till tidig information om utvecklingen inom din bransch.

Ta del av det färdiga arbetet

Vi erbjuder våra kunder allt som rör standarder och deras tillämpning. Hos oss kan du köpa alla publikationer du behöver – allt från enskilda standarder, tekniska rapporter och standardpaket till handböcker och onlinetjänster. Genom vår webbtjänst e-nav får du tillgång till ett lättnavigerat bibliotek där alla standarder som är aktuella för ditt företag finns tillgängliga. Standarder och handböcker är källor till kunskap. Vi säljer dem.

Utveckla din kompetens och lyckas bättre i ditt arbete

Hos SIS kan du gå öppna eller företagsinterna utbildningar kring innehåll och tillämpning av standarder. Genom vår närhet till den internationella utvecklingen och ISO får du rätt kunskap i rätt tid, direkt från källan. Med vår kunskap om standarders möjligheter hjälper vi våra kunder att skapa verklig nytta och lönsamhet i sina verksamheter.

Vill du veta mer om SIS eller hur standarder kan effektivisera din verksamhet är du välkommen in på www.sis.se eller ta kontakt med oss på tel 08-555 523 00.

Standards make the world go round

SIS (Swedish Standards Institute) is an independent non-profit organisation with members from both the private and public sectors. We are part of the European and global network that draws up international standards. Standards consist of documented knowledge developed by prominent actors within the industry, business world and society. They promote cross-border trade, they help to make processes and products safer and they streamline your organisation.

Take part and have influence

As a member of SIS you will have the possibility to participate in standardization activities on national, European and global level. The membership in SIS will give you the opportunity to influence future standards and gain access to early stage information about developments within your field.

Get to know the finished work

We offer our customers everything in connection with standards and their application. You can purchase all the publications you need from us - everything from individual standards, technical reports and standard packages through to manuals and online services. Our web service e-nav gives you access to an easy-to-navigate library where all standards that are relevant to your company are available. Standards and manuals are sources of knowledge. We sell them.

Increase understanding and improve perception

With SIS you can undergo either shared or in-house training in the content and application of standards. Thanks to our proximity to international development and ISO you receive the right knowledge at the right time, direct from the source. With our knowledge about the potential of standards, we assist our customers in creating tangible benefit and profitability in their organisations.

If you want to know more about SIS, or how standards can streamline your organisation, please visit www.sis.se or contact us on phone +46 (0)8-555 523 00

Europastandarden EN 17164:2018 gäller som svensk standard. Detta dokument innehåller den officiella engelska versionen av EN 17164:2018.

The European Standard EN 17164:2018 has the status of a Swedish Standard. This document contains the official version of EN 17164:2018.

Upplysningar om sakinnehållet i standarden lämnas av SIS, Swedish Standards Institute, telefon 08-555 520 00. Standarder kan beställas hos SIS som även lämnar allmänna upplysningar om svensk och utländsk standard.

Information about the content of the standard is available from the Swedish Standards Institute (SIS), telephone +46 8 555 520 00. Standards may be ordered from SIS, who can also provide general information about Swedish and foreign standards.

Denna standard är framtagen av kommittén för Joint-AG Vattenlekredskap, SIS/TK 379/JAG 01.

Har du synpunkter på innehållet i den här standarden, vill du delta i ett kommande revideringsarbete eller vara med och ta fram andra standarder inom området? Gå in på www.sis.se - där hittar du mer information.

EUROPEAN STANDARD

EN 17164

NORME EUROPÉENNE

EUROPÄISCHE NORM

December 2018

ICS 97.220.10

English Version

Climbing/bouldering walls for use in the water area of swimming pools of public use - Safety and operational requirements

Murs et blocs d'escalade destinés aux bassins des piscines à usage public - Exigences de sécurité et d'exploitation

Kletter-/Boulderwände für den Einsatz im Wasserbereich von öffentlich genutzten Schwimmbädern - Sicherheitstechnische und betriebliche Anforderungen

This European Standard was approved by CEN on 26 October 2018.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

European foreword

This document (EN 17164:2018) has been prepared by Technical Committee CEN/TC 136 “Sports, playground and other recreational facilities and equipment”, the secretariat of which is held by DIN.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by June 2019, and conflicting national standards shall be withdrawn at the latest by June 2019.

According to the CEN-CENELEC Internal Regulations, the national standards organisations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

SS-EN 17164:2018 (E)**Introduction**

Climbing/bouldering walls for use in the water area are artificial climbing structures which enable climbing above water without rope safeguarding. The climbing process is terminated either by an accidental fall into the water or by an intentional jump or intentional dropping into the water. When specifying the water depths, it is assumed that no more height can be gained from a fall - as opposed to a jump from a diving board - and the splashdown feature is normally a different one.

The European Committee for Standardization (CEN) draws attention to the fact that it is claimed that compliance with CEN-CENELEC Guide 8:2015 may involve the use of a patent concerning climbing/bouldering walls given in Clause 4.

CEN/CENELEC take no position concerning the evidence, validity and scope of this patent right.

The holder of this patent right has ensured CEN/CENELEC that he is willing to negotiate licences under reasonable and non-discriminatory terms and conditions with applicants throughout the world. In this respect, the statement of the holder of this patent right is registered with CEN/CENELEC. Information may be obtained from:

Christofer Born

Bleichstraße 10 A

90429 Nuremberg

Germany

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights other than those identified above. CEN/CENELEC shall not be held responsible for identifying any or all such patent rights.

The market for climbing/bouldering walls for use in the water area of public used swimming pools is specific and still developing. It is impossible to define an all-embracing safety specification, including all dimensions and design requirements as required by a standard, without limiting the design possibilities and preventing innovative and new, but safe products.

This standard is intended to establish safety requirements and design guidance rules to serve anyone involved with climbing/bouldering walls for use in the water area of public used swimming pools, especially designers, manufacturers, operators and users, to ensure largely safe products. Its basic approach is the consciousness that the use of climbing/bouldering walls usually implies for the users a higher risk level than swimming. Consequently, the use of a climbing/bouldering wall requires a certain degree of self-responsibility in terms of sports equipment. These safety requirements should be taken into consideration and be fulfilled in order to avoid danger to users as much as possible.

1 Scope

This document specifies safety requirements for climbing/bouldering walls, which are vertical and/or overhanging towards the water area, for use in the water area of swimming pools for public use in addition to the general safety requirements of EN 13451-1. It is therefore advised to read this document in conjunction with EN 13451-1. Requirements for the use, the operation and the maintenance are also specified.

This standard is applicable to climbing/bouldering walls in classified swimming pools as specified in EN 15288-1.

This standard is not applicable to climbing/bouldering walls in swimming pools for domestic use.

This standard has limited application to water areas which consist of segregated areas of rivers, lakes or the sea. It is advised to follow the design, working methods and operational requirements insofar as they are relevant. This standard is not applicable to artificial climbing structures according to EN 12572 (all parts) and to inflatable climbing/bouldering walls according to EN ISO 25649-6.

In the aspects which overlap with EN 13451-10 the requirements of this EN standard take precedence over the EN 13451-10.

NOTE In this standard, "climbing" and "bouldering" are used synonymously.

2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

EN 12572-2:2017, *Artificial climbing structures — Part 2: Safety requirements and test methods for bouldering walls*

EN 12572-3:2017, *Artificial climbing structures — Part 3: Safety requirements and test methods for climbing holds*

EN 13451 (all parts), *Swimming pool equipment*

EN 15288 (all parts), *Swimming pools*

EN ISO 7010, *Graphical symbols — Safety colours and safety signs — Registered safety signs (ISO 7010)*

3 Terms and definitions

For the purposes of this document, the terms and definitions given in EN 15288-1, EN 13451 (all parts) and the following apply.

ISO and IEC maintain terminological databases for use in standardization at the following addresses:

- IEC Electropedia: available at <http://www.electropedia.org/>
- ISO Online browsing platform: available at <http://www.iso.org/obp>

3.1

climbing/bouldering wall

artificial climbing structure for climbing above water that enables climbing without rope safeguarding

SS-EN 17164:2018 (E)

3.2

main climbing surface

main action surface of a climbing/bouldering wall

3.3

access climbing surface

climbing surface as a possible access to reach the main climbing surface

3.4

climbing surface

area of a climbing/bouldering wall that may consist of a main climbing surface and an access climbing surface and that may be partially situated under water

3.5

climbing zone

defined area within a climbing surface that it is equipped with holds

3.6

falling space

clearance zone above the pool that can be occupied by a user during a fall

3.7

splashdown space

space of the pool in which the user plunges after a fall

3.8

safety space

falling space and splashdown space

3.9

hold

climbing component used for progression on a climbing or bouldering wall

[SOURCE: EN 12572-3:2017, 3.4 — modified: simplified for climbing/bouldering walls used in the water area of swimming pools for public use]

3.10

maximal height of hold

$H_{H\max}$

height of the highest hold above water level

3.11

height of fall related to the water level

H_F

height of fall of a climbing/bouldering wall equals the maximal height of hold ($H_{H\max}$) minus 1,0 m as follows:

$$H_F = H_{H\max} - 1,0 \text{ m}$$

3.12

water depth

vertical distance between water level and pool bottom

4 Safety requirements

4.1 Dimensions

All dimensions related to the pool walls refer to the pool wall above the standing step (if a standing step is present).

All dimensions related to a hold refer to the centre of the bolt connecting the hold to the wall.

4.2 Water depth and safety space

The minimum dimensions given in Table 1 and Figure 1 shall be complied with.

Table 1 — Minimum safety distances

Dimensions in metres

Maximal height of hold H_{Hmax}	≤ 2	$2 < x \leq 3$	$3 < x \leq 4$	$4 < x \leq 5$	$5 < x \leq 6$	$6 < x \leq 7$	$7 < x \leq 8,5$
Height of fall H_F	≤ 1	≤ 2	≤ 3	≤ 4	≤ 5	≤ 6	$\leq 7,5$
A ^a	$0,65 \times H_F + 1,35$ $\geq 1,80$	$0,65 \times H_F + 1,35$	$0,65 \times H_F + 1,35$	3,50	3,70	3,90	4,10
B	2,5	2,75	3,00	3,25	3,50	3,75	4,15
C	3,5	4,00	4,50	5,00	5,50	6,00	6,75
D	$H_F + 1,00$						
E	$0,65 \times H_F + 1,25$ $\geq 1,80$	$0,65 \times H_F + 1,25$	$0,65 \times H_F + 1,25$	3,40	3,60	3,80	4,00
F	1,50	1,50	1,50	1,75	2,00	2,25	2,65
G	$0,65 \times H_F + 1,25$ $\geq 1,80$	$0,65 \times H_F + 1,25$	$0,65 \times H_F + 1,25$	3,40	3,60	3,80	4,00
H	2,00	2,50	3,00	3,50	4,00	4,50	5,25
NOTE Key is explained in Figure 1.							
^a No head first entry allowed when depth less than 3,5 m.
