SPA och badtunnor i hemmiljö – Säkerhetskrav och provningsmetoder

Domestic spas/whirlpool spas/hot tubs – Safety requirements and test methods

Standarder får världen att fungera

SIS (Swedish Standards Institute) är en fristående ideell förening med medlemmar från både privat och offentlig sektor. Vi är en del av det europeiska och globala nätverk som utarbetar internationella standarder. Standarder är dokumenterad kunskap utvecklad av framstående aktörer inom industri, näringsliv och samhälle och befrämjar handel över gränser, bidrar till att processer och produkter blir säkrare samt effektiviserar din verksamhet.

Delta och påverka

Som medlem i SIS har du möjlighet att påverka framtida standarder inom ditt område på nationell, europeisk och global nivå. Du får samtidigt tillgång till tidig information om utvecklingen inom din bransch.

Ta del av det färdiga arbetet

Vi erbjuder våra kunder allt som rör standarder och deras tillämpning. Hos oss kan du köpa alla publikationer du behöver – allt från enskilda standarder, tekniska rapporter och standardpaket till handböcker och onlinetjänster. Genom vår webbtjänst e-nav får du tillgång till ett lättnavigerat bibliotek där alla standarder som är aktuella för ditt företag finns tillgängliga. Standarder och handböcker är källor till kunskap. Vi säljer dem.

Utveckla din kompetens och lyckas bättre i ditt arbete

Hos SIS kan du gå öppna eller företagsinterna utbildningar kring innehåll och tillämpning av standarder. Genom vår närhet till den internationella utvecklingen och ISO får du rätt kunskap i rätt tid, direkt från källan. Med vår kunskap om standarders möjligheter hjälper vi våra kunder att skapa verklig nytta och lönsamhet i sina verksamheter.

Vill du veta mer om SIS eller hur standarder kan effektivisera din verksamhet är du välkommen in på www.sis.se eller ta kontakt med oss på tel 08-555 523 00.

Standards make the world go round

SIS (Swedish Standards Institute) is an independent non-profit organisation with members from both the private and public sectors. We are part of the European and global network that draws up international standards. Standards consist of documented knowledge developed by prominent actors within the industry, business world and society. They promote cross-border trade, they help to make processes and products safer and they streamline your organisation.

Take part and have influence

As a member of SIS you will have the possibility to participate in standardization activities on national, European and global level. The membership in SIS will give you the opportunity to influence future standards and gain access to early stage information about developments within your field.

Get to know the finished work

We offer our customers everything in connection with standards and their application. You can purchase all the publications you need from us - everything from individual standards, technical reports and standard packages through to manuals and online services. Our web service e-nav gives you access to an easy-to-navigate library where all standards that are relevant to your company are available. Standards and manuals are sources of knowledge. We sell them.

Increase understanding and improve perception

With SIS you can undergo either shared or in-house training in the content and application of standards. Thanks to our proximity to international development and ISO you receive the right knowledge at the right time, direct from the source. With our knowledge about the potential of standards, we assist our customers in creating tangible benefit and profitability in their organisations.

If you want to know more about SIS, or how standards can streamline your organisation, please visit www.sis.se or contact us on phone +46 (0)8-555 523 00

Europastandarden EN 17125:2018 gäller som svensk standard. Detta dokument innehåller den officiella engelska versionen av EN 17125:2018.

The European Standard EN 17125:2018 has the status of a Swedish Standard. This document contains the official version of EN 17125:2018.

NORME EUROPÉENNE

EUROPÄISCHE NORM

December 2018

ICS 91.140.70

English Version

Domestic spas/whirlpool spas/hot tubs - Safety requirements and test methods

Spas domestiques et les spas - Les exigences de sécurité et méthodes d'essai

Warmsprudelbecken und Whirlpools für private Nutzung - Sicherheitstechnische Anforderungen und Prüfverfahren

This European Standard was approved by CEN on 3 September 2018.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

European foreword

This document (EN 17125:2018) has been prepared by Technical Committee CEN/TC 402 "Domestic Pools and Spas", the secretariat of which is held by AFNOR.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by June 2019 and conflicting national standards shall be withdrawn at the latest by June 2019.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN shall not be held responsible for identifying any or all such patent rights.

According to the CEN-CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

SS-EN 17125:2018 (E)**Introduction**

This European Standard outlines the technical items of associated equipment necessary for a properly equipped spa or hot tub to ensure it is clean, healthy and safe to use.

This European Standard is a recommendation that supports a variety of legal Regulations and Codes of Practice in each country. This standard is designed to complement the required rules and regulations contained in European Regulations such as:

- Building Regulations;
- Health and Safety/Health Protection Regulations;
- Regulation (EC) No 1907/2006 (REACH);
- Restriction on the Use of Certain Hazardous Substances in Electrical and Electronic Equipment, see Directive 2011/65/EU;
- Water Supply Regulation(s) (e.g. Commission Directive (EU) 2015/1787);
- Waste Electrical and Electronic Equipment Regulations (WEEE), see Directive 2012/19/EU;
- or in European Standards, such as EN 60335-2-60.

It is recommended that the design of all domestic spas is based on the parameters indicated in this standard, to ensure they are manufactured and installed correctly and the end user is aware of the correct operation and maintenance to ensure they are safe and healthy to use.

It is recommended that manufacturers, distributors, importers and retailers have a clear working knowledge of the requirements contained within this standard.

During the production of this standard, it was found that in certain areas and for certain formulae, several quite valid variations were possible. Therefore, the standard does not preclude the use of alternative formulae or procedures, where a specialist design may require such. It should also be acknowledged that with advances in technology, new products and design innovations will of necessity be introduced and procedures are in place to provide for consideration of these within future amendments to this standard.

Irrespective of anything contained in this standard, responsibility for specific Health and Safety issues and compliance with relevant National legislation shall be taken into consideration in relation to any contract during design, construction and operation and will remain the responsibility of the parties involved.

1 Scope

This document specifies safety requirements and test methods for domestic spas/whirlpool spas/hot tubs (see 3.2) for indoor and/or outdoor use, covering the following:

- portable spas including inflatable spas;
- exercise spas (factory-built or field-engineered);
- Scandinavian hot tubs;
- field-engineered spas;
- any associated equipment.

This document also provides advice and guidance for installers and maintainers of domestic spas/whirlpool spas/hot tubs.

This document is not applicable to:

- any type of swimming pool (domestic or public);
- mini-pools according to EN 16927;
- public spas (public use according to EN 15288);
- paddling pools according to EN 71-8;
- spas specifically intended for physical/medical therapy;
- spas specifically intended for beauty therapy;
- flotation tanks and flotation pools;
- bath tubs (including whirlpool baths);
- natural spas (name used to describe a bathing area, which is filled with untreated geothermally heated water);
- birthing pools.

2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.
