Standarder får världen att fungera

SIS (Swedish Standards Institute) är en fristående ideell förening med medlemmar från både privat och offentlig sektor. Vi är en del av det europeiska och globala nätverk som utarbetar internationella standarder. Standarder är dokumenterad kunskap utvecklad av framstående aktörer inom industri, näringsliv och samhälle och befrämjar handel över gränser, bidrar till att processer och produkter blir säkrare samt effektiviserar din verksamhet.

Delta och påverka

Som medlem i SIS har du möjlighet att påverka framtida standarder inom ditt område på nationell, europeisk och global nivå. Du får samtidigt tillgång till tidig information om utvecklingen inom din bransch.

Ta del av det färdiga arbetet

Vi erbjuder våra kunder allt som rör standarder och deras tillämpning. Hos oss kan du köpa alla publikationer du behöver – allt från enskilda standarder, tekniska rapporter och standardpaket till handböcker och onlinetjänster. Genom vår webbtjänst e-nav får du tillgång till ett lättnavigerat bibliotek där alla standarder som är aktuella för ditt företag finns tillgängliga. Standarder och handböcker är källor till kunskap. Vi säljer dem.

Utveckla din kompetens och lyckas bättre i ditt arbete

Hos SIS kan du gå öppna eller företagsinterna utbildningar kring innehåll och tillämpning av standarder. Genom vår närhet till den internationella utvecklingen och ISO får du rätt kunskap i rätt tid, direkt från källan. Med vår kunskap om standarders möjligheter hjälper vi våra kunder att skapa verklig nytta och lönsamhet i sina verksamheter.

Vill du veta mer om SIS eller hur standarder kan effektivisera din verksamhet är du välkommen in på www.sis.se eller ta kontakt med oss på tel 08-555 523 00.

Standards make the world go round

SIS (Swedish Standards Institute) is an independent non-profit organisation with members from both the private and public sectors. We are part of the European and global network that draws up international standards. Standards consist of documented knowledge developed by prominent actors within the industry, business world and society. They promote cross-border trade, they help to make processes and products safer and they streamline your organisation.

Take part and have influence

As a member of SIS you will have the possibility to participate in standardization activities on national, European and global level. The membership in SIS will give you the opportunity to influence future standards and gain access to early stage information about developments within your field.

Get to know the finished work

We offer our customers everything in connection with standards and their application. You can purchase all the publications you need from us - everything from individual standards, technical reports and standard packages through to manuals and online services. Our web service e-nav gives you access to an easy-to-navigate library where all standards that are relevant to your company are available. Standards and manuals are sources of knowledge. We sell them.

Increase understanding and improve perception

With SIS you can undergo either shared or in-house training in the content and application of standards. Thanks to our proximity to international development and ISO you receive the right knowledge at the right time, direct from the source. With our knowledge about the potential of standards, we assist our customers in creating tangible benefit and profitability in their organisations.

If you want to know more about SIS, or how standards can streamline your organisation, please visit www.sis.se or contact us on phone +46 (0)8-555 523 00

Den internationella standarden ISO 24394:2018 gäller som svensk standard. Detta dokument innehåller den officiella engelska versionen av ISO 24394:2018.

Denna standard ersätter SS-ISO 24394:2009, utgåva 1 och SS-ISO 24394:2009/Amd 1:2012, utgåva 1

The International Standard ISO 24394:2018 has the status of a Swedish Standard. This document contains the official English version of ISO 24394:2018.

This standard supersedes the SS-ISO 24394:2009, edition 1 and SS-ISO 24394:2009/Amd 1:2012, edition 1

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 44, *Welding and allied processes*, Subcommittee SC 14, *Welding and brazing in aerospace*.

Any feedback, question or request for official interpretation related to any aspect of this document should be directed to the Secretariat of ISO/TC 44/SC 14 via your national standards body. A complete listing of these bodies can be found at www.iso.org/members.html. Official interpretations, where they exist, are available from this page: <https://committee.iso.org/sites/tc44/home/interpretation.html>.

This second edition cancels and replaces the first edition (ISO 24394:2008). It also incorporates the Amendment ISO 24394:2008/Amd 1:2012. The main changes compared to the previous edition are:

- the terms welding equipment operator and automatic welding have been introduced as [3.4](#) and [3.12](#);
- old subclause 4.1.3 has been moved to [4.1](#);
- requirements in [4.4](#) have been refined;
- Tables 1 to 4 have been created to present the ranges of qualification for welding positions for every test piece;
- in [4.5](#), material group F has been introduced;
- the header of [4.6](#) has been changed and new subclause [4.6.3](#) has been created;
- in [4.6.1](#) and [4.6.2](#), the qualification of thickness ranges has been clarified;
- requirements in [5.1](#) have been changed;
- a bullet list has been added to [6.1.1](#);
- in [6.2](#), a new requirement has been introduced that the theory test shall be documented;
- references to EN 462 series for radiographic images have been deleted;

- [Clause 9](#) has been reworded to clearly state that only the features created by welding shall be assessed for TP6;
- [Clause 10](#) has been changed so that if a welder/welding operator needs vision correction, it shall be noted on the test certificate;
- in Tables A.1 to A.4, new material group F has been included;
- the document has been editorially revised.

Introduction

A welder or welding operator qualification test properly passed in accordance with this document demonstrates that the welder or welding operator concerned has been proved to possess the minimum degree of skill and knowledge required for the fusion welding of aerospace hardware.

Welding for aerospace applications — Qualification test for welders and welding operators — Fusion welding of metallic components

1 Scope

This document specifies requirements for the qualification of welders and welding operators for the fusion welding of metallic materials for aerospace applications.

NOTE Success in the test is an essential precondition for the qualification of welders (3.2) and welding operators (3.3) in new production and repair work in aerospace. However, welding equipment operators (3.4) do not need to be qualified according to this document.

2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

ISO 4063, *Welding and allied processes — Nomenclature of processes and reference numbers*

ISO 6520-1:2007, *Welding and allied processes — Classification of geometric imperfections in metallic materials — Part 1: Fusion welding*

ISO 6947, *Welding and allied processes — Welding positions*

ISO 9606-2, *Qualification test of welders — Fusion welding — Part 2: Aluminium and aluminium alloys*

ISO 14731, *Welding coordination — Tasks and responsibilities*

ISO 18490, *Non-destructive testing — Evaluation of vision acuity of NDT personnel*

EN 4179, *Aerospace series — Qualification and approval of personnel for non-destructive testing*

SAE AMS 2694C, *In-Process Welding of Castings*

3 Terms and definitions

For the purposes of this document, the terms and definitions given in ISO 6520-1, ISO 9606-2, ISO 14731 and the following apply.

ISO and IEC maintain terminological databases for use in standardization at the following addresses:

— ISO Online browsing platform: available at <https://www.iso.org/obp>

— IEC Electropedia: available at <http://www.electropedia.org/>

3.1

parent material form

type of the semi-finished product

Note 1 to entry: Semi-finished products are sheets/plates, tubes and castings.

3.2

welder

person who holds and manipulates the electrode holder, welding torch or blowpipe by hand

Note 1 to entry: In this document, a blowpipe is considered to be a gas welding torch.

SS-ISO 24394:2019 (E)

[SOURCE: ISO/TR 25901-1:2016, 2.5.24, modified — In the definition, the word “welding” has been added before “torch” and “during welding” has been replaced with “by hand” at the end. Also, Note 1 to entry has been added.]

3.3 welding operator

<welding for aerospace applications> person who prepares the joint and sets up mechanized or automated welding equipment and thereby has direct influence on the welded joint quality

3.4 welding equipment operator

<welding for aerospace applications> person who only operates automatic welding equipment and has no direct influence on the welded joint quality

3.5 examiner

person who has been appointed to verify compliance with the applicable standard

Note 1 to entry: In certain cases, an external independent examiner can be required.

[SOURCE: ISO/TR 25901-1:2016, 2.5.29]

3.6 examining body

organization that has been appointed to verify compliance with the applicable standard

Note 1 to entry: In certain cases, an external independent examining body can be required.

[SOURCE: ISO/TR 25901-1:2016, 2.5.30]

3.7 rework

any corrective action made to a weldment in the as-welded condition

3.8 design/engineering authority

organization that has the responsibility for the structural integrity or maintenance of airworthiness of the hardware and compliance with all relevant documents

3.9 backing

material placed at the reverse side of a joint preparation for the purpose of supporting molten weld metal

3.10 welding procedure specification WPS

document that has been qualified and provides the required variables of the welding procedure to ensure repeatability during production welding

[SOURCE: ISO/TR 25901-1:2016, 2.5.4]

3.11 preliminary welding procedure specification pWPS

document containing the required variables of the welding procedure which needs to be qualified

[SOURCE: ISO/TR 25901-1:2016, 2.5.6, modified — In the definition, “has to” has been changed to “needs to”.]

3.12

automatic welding

welding in which all operations are performed without welding operator intervention during the process

Note 1 to entry: Manual adjustment of welding variables by the welding operator during welding is not possible.

[SOURCE: ISO 14732:2013, 3.1]

4 Qualification test requirements

4.1 General

4.1.1 Specific to the welder qualification test

The welder qualification tests are classified according to:

- a) parent material form;
- b) types of welds (butt/fillet);
- c) welding processes;
- d) material groups;
- e) thickness ranges;
- f) welding positions.

The welding coordinator of the plant or the fabricator shall select from [Table 6](#) the test piece as required for the production work on which the welder is to be employed. Two complementary specific test pieces (TP5 and TP6) may also be chosen as defined in [4.4](#) and [4.7.1](#).

4.1.2 Specific to the welding operator qualification test

The welding operator qualification tests are classified according to welding process and welding machine type.

NOTE Machine type within the scope of this document stands for longitudinal, orbital, circumferential and robotic welding machines.

For multiple welding machine types, additional qualification shall be at the discretion of the responsible welding coordinator.

The welding operator has to show theoretical knowledge of the welding process.

In the practical part of the qualification test, the welding operator shall demonstrate competency in operating the welding machine according to an established WPS.

A test weld of any type of weld with a process on a given welding machine type shall qualify for all product types/semi-finished products and all types of welds with this process and this machine type.

The test weld can be performed on dedicated test pieces or production parts.

When substituting test pieces with actual production parts, testing shall be carried out according to [Table 7](#).
