# Standarder får världen att fungera

*SIS (Swedish Standards Institute) är en fristående ideell förening med medlemmar från både privat och offentlig sektor. Vi är en del av det europeiska och globala nätverk som utarbetar internationella standarder. Standarder är dokumenterad kunskap utvecklad av framstående aktörer inom industri, näringsliv och samhälle och befrämjar handel över gränser, bidrar till att processer och produkter blir säkrare samt effektiviserar din verksamhet.*

## Delta och påverka

Som medlem i SIS har du möjlighet att påverka framtida standarder inom ditt område på nationell, europeisk och global nivå. Du får samtidigt tillgång till tidig information om utvecklingen inom din bransch.

## Ta del av det färdiga arbetet

Vi erbjuder våra kunder allt som rör standarder och deras tillämpning. Hos oss kan du köpa alla publikationer du behöver – allt från enskilda standarder, tekniska rapporter och standardpaket till handböcker och onlinetjänster. Genom vår webbtjänst e-nav får du tillgång till ett lättnavigerat bibliotek där alla standarder som är aktuella för ditt företag finns tillgängliga. Standarder och handböcker är källor till kunskap. Vi säljer dem.

## Utveckla din kompetens och lyckas bättre i ditt arbete

Hos SIS kan du gå öppna eller företagsinterna utbildningar kring innehåll och tillämpning av standarder. Genom vår närhet till den internationella utvecklingen och ISO får du rätt kunskap i rätt tid, direkt från källan. Med vår kunskap om standarders möjligheter hjälper vi våra kunder att skapa verklig nytta och lönsamhet i sina verksamheter.

**Vill du veta mer om SIS eller hur standarder kan effektivisera din verksamhet är du välkommen in på [www.sis.se](http://www.sis.se) eller ta kontakt med oss på tel 08-555 523 00.**

# Standards make the world go round

*SIS (Swedish Standards Institute) is an independent non-profit organisation with members from both the private and public sectors. We are part of the European and global network that draws up international standards. Standards consist of documented knowledge developed by prominent actors within the industry, business world and society. They promote cross-border trade, they help to make processes and products safer and they streamline your organisation.*

## Take part and have influence

As a member of SIS you will have the possibility to participate in standardization activities on national, European and global level. The membership in SIS will give you the opportunity to influence future standards and gain access to early stage information about developments within your field.

## Get to know the finished work

We offer our customers everything in connection with standards and their application. You can purchase all the publications you need from us - everything from individual standards, technical reports and standard packages through to manuals and online services. Our web service e-nav gives you access to an easy-to-navigate library where all standards that are relevant to your company are available. Standards and manuals are sources of knowledge. We sell them.

## Increase understanding and improve perception

With SIS you can undergo either shared or in-house training in the content and application of standards. Thanks to our proximity to international development and ISO you receive the right knowledge at the right time, direct from the source. With our knowledge about the potential of standards, we assist our customers in creating tangible benefit and profitability in their organisations.

**If you want to know more about SIS, or how standards can streamline your organisation, please visit [www.sis.se](http://www.sis.se) or contact us on phone +46 (0)8-555 523 00**

Den internationella standarden ISO 44002:2019 gäller som svensk standard. Detta dokument innehåller den officiella engelska versionen av ISO 44002:2019.

The International Standard ISO 44002:2019 has the status of a Swedish Standard. This document contains the official English version of ISO 44002:2019.

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see [www.iso.org/directives](http://www.iso.org/directives)).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see [www.iso.org/patents](http://www.iso.org/patents)).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see [www.iso.org/iso/foreword.html](http://www.iso.org/iso/foreword.html).

This document was prepared by Technical Committee ISO/TC 286, *Collaborative business relationship management*.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at [www.iso.org/members.html](http://www.iso.org/members.html).

# Introduction

## 0.1 General

This document provides guidance that supports the effective implementation of ISO 44001 in order to establish and improve collaborative business relationship management systems (CBRMSs) in organizations of all sizes. This document contains no additional requirements. It is aimed at readers who seek to gain in-depth knowledge and understanding about the requirements in ISO 44001, e.g. for the purpose of aiding an organization’s implementation process.

The case for the significant business value and benefits to be derived from collaborative working was made in ISO 44001.

This document has been developed using pan-industry best practice, including early adopters of ISO 44001. It is intended to help organizations understand why each element of ISO 44001 is important, and to recommend approaches to be taken for practical implementation. How to meet the requirements has to be individually evaluated and applied in the context of each organization.

In ISO 44001, the multi-dimensional nature of collaborative relationships was specified. Many of these relationships have an outward focus, emphasizing the importance of collaboration in managing different goals, objectives, expectations, cultures and behaviours between organizations.

Collaboration can also be used to focus on internal interfaces to optimize existing activities, consolidate internal changes or to speed up the process of integration during acquisitions and mergers. In these circumstances, the guidance in this document is also relevant. In a collaborative relationship, effective operation relies on specific mutually agreed joint objectives, structures, resources, processes, roles and responsibilities and can require specific variations to established processes. The structure of this document has been developed to align with ISO 44001, using the high level structure (HLS) for management systems standards (MSS). In developing a standard for collaborative business relationships, the detailed specific requirements for establishing, developing and managing third-party relationships utilizing the eight-stage life cycle model (see [Figure 1](#)) have been addressed within [Clause 8](#) (Operations). In a collaborative relationship, effective operation relies on specific mutually agreed joint interfaces, processes, roles and responsibilities and can require specific variations to established processes.

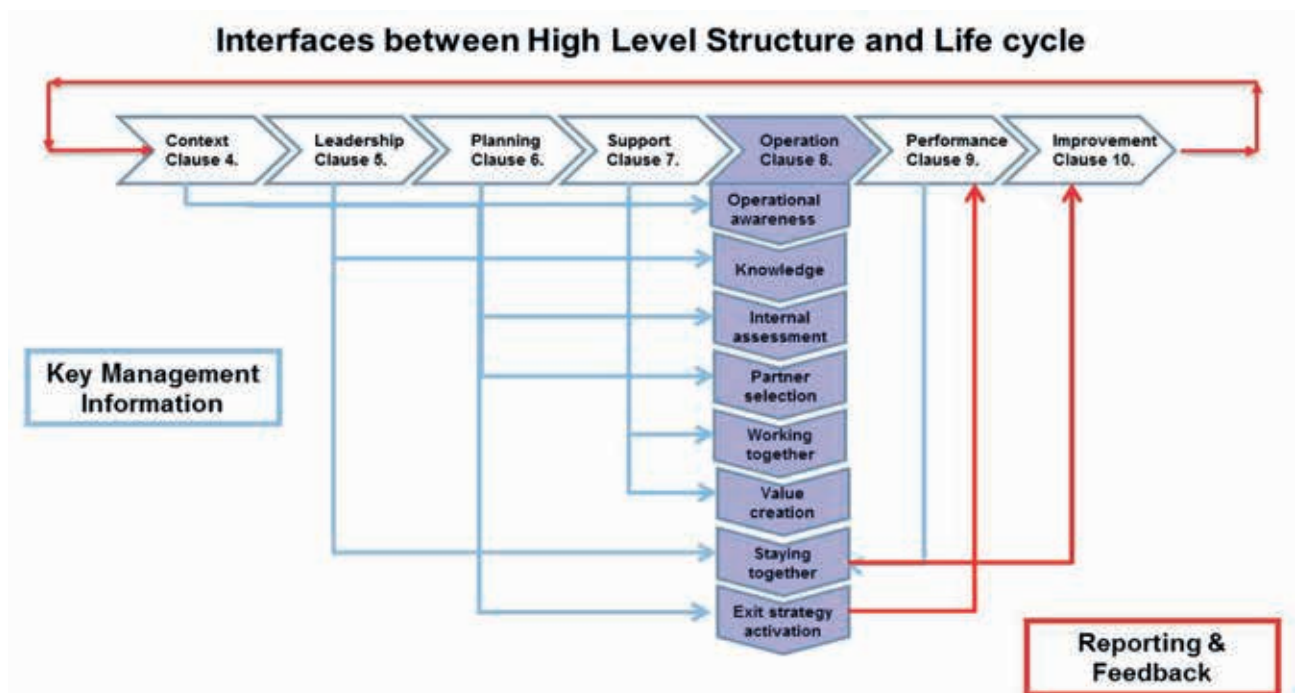

Figure 1 — Relationship between corporate and operational systems

## 0.2 How to use this guidance

This document has been structured so that the clause numbering mirrors those used for the corresponding clauses in ISO 44001.

The stages described in [Clause 8](#) are introduced by commentary that explains more about the purpose and aims of each stage. A flowchart is included to illustrate the path through the steps within each stage. Each box within the flowchart represents both the clauses contained in ISO 44001 and the supporting clauses in this document.

Each of the subclauses is structured in the same simple format as follows:

- a) first, a summary of the intent of the corresponding clause in ISO 44001;
- b) then, an explanation of the relevance and importance of supporting the development of effective collaborative working;
- c) finally, guidance on how to implement the matching clause in ISO 44001, e.g. suggested approaches and areas for consideration.

Where appropriate, the clauses are supported by tables, figures and models and methods that can be used in implementation.

For clarity and increased understanding, it is recommended that ISO 44001 and this document are read together. Further useful information is provided in the annexes to ISO 44001.

It could appear that certain requirements in ISO 44001 are duplicated. However, in these cases they are a reflection of the evolution of processes throughout the relationship life cycle. The HLS describes those requirements that occur at an organizational level, while the subclauses in [Clause 8](#) describe similar requirements that apply to a specific collaboration.

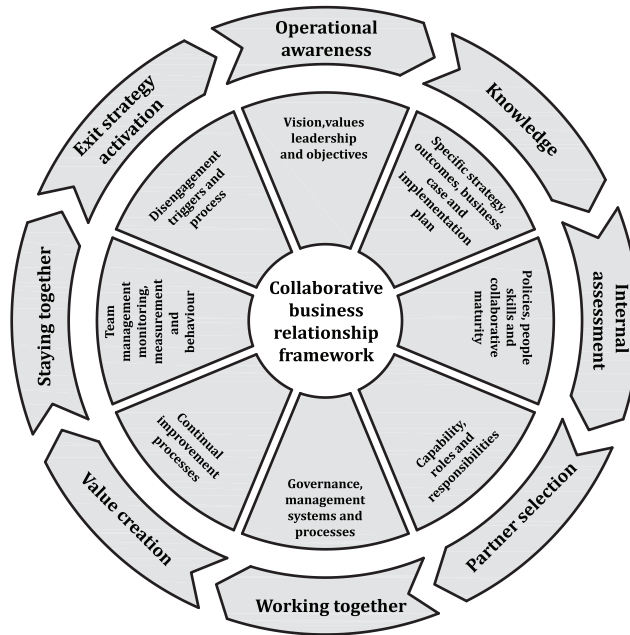

The guidance provided by this document enables the integration of the ISO 44001 framework into an organization's established operations, activities, processes and procedures to optimize the benefits of collaboration between organizations. In this context, the adoption of this collaborative approach enhances and does not detract from the obligations and responsibilities agreed between the parties and its application is commensurate to the size and complexity of the organizations involved.

The following additional considerations are included to support requirements and third-party engagements.

## 0.3 Common principles of relationship management

### 0.3.1 The life cycle framework

The life cycle framework addresses a number of themes that cascade from the high-level management system and vary within the context and maturity of a specific relationship life cycle. These evolving themes impact the behaviours and organizational culture of collaborating organizations to ensure they are effective, optimized and deliver enhanced benefit to the stakeholders through collaborative approaches (see [Figure 2](#)).

**Figure 2 — Overview of the principal components of successful collaborative business relationships**

In the context of collaborative relationships, the life cycle model outlines the key steps to an effective management process from concept adoption to disengagement. The eight stages are:

- a) operational awareness: establishing the operation's propensity for collaboration;
- b) knowledge: evaluating specific collaborative benefits and business case;
- c) internal assessment: assessing the operation's capability to collaborate;
- d) partner selection: establishing an appropriate selection process;
- e) working together: establishing a joint governance model for collaboration;
- f) value creation: establishing a joint process for continual improvement;
- g) staying together: managing, monitoring and measuring the relationship over time;
- h) exit strategy activation: establishing a joint approach to disengagement and/or future.

### 0.3.2 The sequence of stages

While [Clause 8](#) follows an eight-stage process, it is recognized that the entry point for any specific collaborative relationship can vary.
