Standarder får världen att fungera

SIS (Swedish Standards Institute) är en fristående ideell förening med medlemmar från både privat och offentlig sektor. Vi är en del av det europeiska och globala nätverk som utarbetar internationella standarder. Standarder är dokumenterad kunskap utvecklad av framstående aktörer inom industri, näringsliv och samhälle och befrämjar handel över gränser, bidrar till att processer och produkter blir säkrare samt effektiviserar din verksamhet.

Delta och påverka

Som medlem i SIS har du möjlighet att påverka framtida standarder inom ditt område på nationell, europeisk och global nivå. Du får samtidigt tillgång till tidig information om utvecklingen inom din bransch.

Ta del av det färdiga arbetet

Vi erbjuder våra kunder allt som rör standarder och deras tillämpning. Hos oss kan du köpa alla publikationer du behöver – allt från enskilda standarder, tekniska rapporter och standardpaket till handböcker och onlinetjänster. Genom vår webbtjänst e-nav får du tillgång till ett lättnavigerat bibliotek där alla standarder som är aktuella för ditt företag finns tillgängliga. Standarder och handböcker är källor till kunskap. Vi säljer dem.

Utveckla din kompetens och lyckas bättre i ditt arbete

Hos SIS kan du gå öppna eller företagsinterna utbildningar kring innehåll och tillämpning av standarder. Genom vår närhet till den internationella utvecklingen och ISO får du rätt kunskap i rätt tid, direkt från källan. Med vår kunskap om standarders möjligheter hjälper vi våra kunder att skapa verklig nytta och lönsamhet i sina verksamheter.

Vill du veta mer om SIS eller hur standarder kan effektivisera din verksamhet är du välkommen in på www.sis.se eller ta kontakt med oss på tel 08-555 523 00.

Standards make the world go round

SIS (Swedish Standards Institute) is an independent non-profit organisation with members from both the private and public sectors. We are part of the European and global network that draws up international standards. Standards consist of documented knowledge developed by prominent actors within the industry, business world and society. They promote cross-border trade, they help to make processes and products safer and they streamline your organisation.

Take part and have influence

As a member of SIS you will have the possibility to participate in standardization activities on national, European and global level. The membership in SIS will give you the opportunity to influence future standards and gain access to early stage information about developments within your field.

Get to know the finished work

We offer our customers everything in connection with standards and their application. You can purchase all the publications you need from us - everything from individual standards, technical reports and standard packages through to manuals and online services. Our web service e-nav gives you access to an easy-to-navigate library where all standards that are relevant to your company are available. Standards and manuals are sources of knowledge. We sell them.

Increase understanding and improve perception

With SIS you can undergo either shared or in-house training in the content and application of standards. Thanks to our proximity to international development and ISO you receive the right knowledge at the right time, direct from the source. With our knowledge about the potential of standards, we assist our customers in creating tangible benefit and profitability in their organisations.

If you want to know more about SIS, or how standards can streamline your organisation, please visit www.sis.se or contact us on phone +46 (0)8-555 523 00

Den internationella standarden ISO 15031-6:2015 gäller som svensk standard. Detta dokument innehåller den officiella engelska versionen av ISO 15031-6:2015.

Denna standard ersätter SS-ISO 15031-6:2010, utgåva 2.

The International Standard ISO 15031-6:2015 has the status of a Swedish Standard. This document contains the official English version of ISO 15031-6:2015.

This standard supersedes the Swedish Standard SS-ISO 15031-6:2010, edition 2.

© Copyright/Upphovsrätten till denna produkt tillhör SIS, Swedish Standards Institute, Stockholm, Sverige. Användningen av denna produkt regleras av slutanvändarlicensen som återfinns i denna produkt, se standardens sista sidor.

© Copyright SIS, Swedish Standards Institute, Stockholm, Sweden. All rights reserved. The use of this product is governed by the end-user licence for this product. You will find the licence in the end of this document.

Uppllysningar om sakinnehållet i standarden lämnas av SIS, Swedish Standards Institute, telefon 08-555 520 00. Standarder kan beställas hos SIS Förlag AB som även lämnar allmänna uppllysningar om svensk och utländsk standard.

Information about the content of the standard is available from the Swedish Standards Institute (SIS), telephone +46 8 555 520 00. Standards may be ordered from SIS Förlag AB, who can also provide general information about Swedish and foreign standards.

Denna standard är framtagen av kommittén för Datakommunikation och diagnostik för vägfordon, SIS/TK 240/AG 1.

Har du synpunkter på innehållet i den här standarden, vill du delta i ett kommande revideringsarbete eller vara med och ta fram andra standarder inom området? Gå in på www.sis.se - där hittar du mer information.

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the WTO principles in the Technical Barriers to Trade (TBT) see the following URL: [Foreword - Supplementary information](#)

The committee responsible for this document is ISO/TC 22, *Road vehicles*, Subcommittee SC 31, *Data communication*.

This third edition cancels and replaces the second edition (ISO 15031-6:2010), which has been technically revised.

ISO 15031 consists of the following parts, under the general title *Road vehicles — Communication between vehicle and external equipment for emissions-related diagnostics*:

- *Part 1: General information and use case definition*
- *Part 2: Guidance on terms, definitions, abbreviations and acronyms*
- *Part 3: Diagnostic connector and related electrical circuits, specification and use*
- *Part 4: External test equipment*
- *Part 5: Emissions-related diagnostic services*
- *Part 6: Diagnostic trouble code definitions*
- *Part 7: Data link security*

Introduction

Overview

ISO 15031 consists of a number of parts which, taken together, provide a coherent self-consistent set of specifications to facilitate emissions-related diagnostics. ISO 15031-1 provides an introduction to the series of International Standards. ISO 15031-2 through ISO 15031-7 are based on SAE recommended practices. This part of ISO 15031 is based on SAE J2012 (Diagnostic Trouble Code Definitions).

This International Standard includes the communication between the vehicle's On-Board Diagnostic (OBD) systems and test equipment implemented across vehicles within the scope of the legislated emissions-related OBD.

To achieve this, it is based on the Open Systems Interconnection (OSI) Basic Reference Model in accordance with ISO/IEC 7498 and ISO/IEC 10731, which structures communication systems into seven layers. When mapped on this model, the services specified by this International Standard are broken into the following layers in accordance with [Table 1](#).

- Diagnostic services (layer 7), specified in the following:
 - ISO 15031-5 (emissions-related OBD);
 - ISO 27145-3 (WWH-OBD).
- Presentation layer (layer 6), specified in the following:
 - ISO 15031-2, SAE J1930-DA;
 - ISO 15031-5, SAE J1979-DA;
 - ISO 15031-6, SAE J2012-DA (OBD);
 - ISO 27145-2, SAE J2012-DA (WWH-OBD).
- Session layer services (layer 5), specified in the following:
 - ISO 14229-2 supports ISO 15765-4 DoCAN and ISO 14230-4 DoK-Line protocols;
 - ISO 14229-2 is not applicable to the SAE J1850 and ISO 9141-2 protocols.
- Transport layer services (layer 4), specified in the following:
 - ISO 15765-2 Transport protocol and network layer services;
 - SAE J1850 defined in ISO 15031-5 Emissions-related diagnostic services;
 - ISO 9141-2 defined in ISO 15031-5 Emissions-related diagnostic services;
 - ISO 14230-4 defined in ISO 15031-5 Emissions-related diagnostic services.
- Network layer services (layer 3), specified in the following:
 - ISO 15765-2 Transport protocol and network layer services;
 - SAE J1850 defined in ISO 15031-5 Emissions-related diagnostic services;
 - ISO 9141-2 defined in ISO 15031-5 Emissions-related diagnostic services;
 - ISO 14230-4 defined in ISO 15031-5 Emissions-related diagnostic services.
- Data link layer (layer 2), specified in the following:
 - ISO 15765-4, ISO 11898-1, ISO 11898-2;

- SAE J1850;
- ISO 9141-2;
- ISO 14230-2.
- Physical layer (layer 1), specified in the following:
 - ISO 15765-4, ISO 11898-1, ISO 11898-2;
 - SAE J1850;
 - ISO 9141-2;
 - ISO 14230-1.

Table 1 — Legislated emissions-related OBD/WWH-OBD diagnostic specifications applicable to the OSI layers

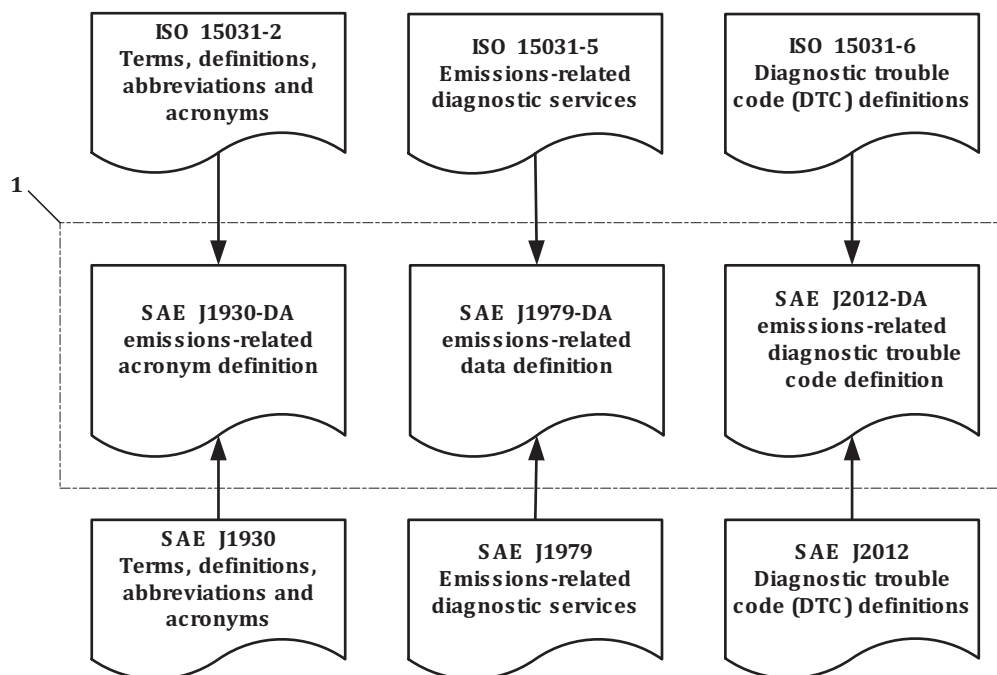

| Applicability | OSI 7 layers | Emissions-related OBD communication requirements | | | | Emissions-related WWH-OBD communication requirements | | | |
|---|------------------------|--|------------|-------------|-----------------------------|--|-----------------------------|-------------|-------------|
| Seven layer according to ISO/IEC 7498-1 and ISO/IEC 10731 | Application (layer 7) | ISO 15031-5 | | | | ISO 27145-3 | | | |
| | Presentation (layer 6) | ISO 15031-2, -5, -6 SAE J1930-DA/SAE J1979-DA | | | | ISO 27145-2 SAE J1930-DA/SAE J1979-DA | | | |
| | | SAE J2012-DA (OBD) | | | | SAE J2012-DA (WWH-OBD) | | | |
| | Session (layer 5) | Not applicable | | ISO 14229-2 | | | | | |
| | Transport (layer 4) | ISO 15031-5 | | ISO 14230-4 | ISO 15765-2 | ISO 15765-4 | ISO 15765-2 | ISO 27145-4 | ISO 13400-2 |
| | Network (layer 3) | | | ISO 14230-2 | ISO 11898-1, ISO 11898-2 | | ISO 11898-1, ISO 11898-2 | | ISO 13400-3 |
| | Data link (layer 2) | SAE J1850 | ISO 9141-2 | ISO 14230-1 | ISO 11898-1, ISO 11898-2 | ISO 15765-4 | ISO 11898-1, ISO 11898-2 | ISO 27145-4 | ISO 13400-3 |
| | Physical (layer 1) | SAE J1850 | ISO 9141-2 | ISO 14230-1 | ISO 11898-1, ISO 11898-2 | ISO 15765-4 | ISO 11898-1, ISO 11898-2 | ISO 27145-4 | ISO 13400-3 |

SAE document reference concept

ISO 15031 references several SAE documents which contain all terms, data, and DTC definitions.

See [Figure 1](#) with the following definition of content in this International Standard.

- SAE J1930: the document is concerned with a procedure for naming objects and systems and with the set of words from which names are built. It references SAE J1930-DA which contains all standardized naming objects, terms, and abbreviations.
- SAE J1979: the document is concerned with the definition of emissions-related diagnostic services (diagnostic test modes). It references SAE J1979-DA which contains all standardized data items like PIDs, test IDs, monitor IDs, and InfoType IDs.
- SAE J2012: the document is concerned with the procedure for defining emissions-related diagnostic trouble codes. It references SAE J2012-DA which contains all standardized data items like DTCs and FTBs.

**Key**

1 SAE Digital Annexes

Figure 1 — SAE Digital Annex document reference

On-Board Diagnostic (OBD) regulations require passenger cars and light, medium, and heavy duty trucks to support a minimum set of diagnostic information to external (off-board) “generic” test equipment. New emissions-related regulatory requirements drive new in-vehicle technology to lower emissions. New technology-related OBD monitor data and diagnostic trouble codes need to be standardized to support the external (off-board) “generic” test equipment. All relevant information is proposed by the automotive industry represented by members of the appropriate SAE task force.

SAE J2012-DA (OBD) Digital Annex

This part of ISO 15031 references SAE J2012-DA. SAE J2012-DA is concerned with the definition of DTCs (diagnostic trouble codes) and FTB (failure type byte) information.

SAE J2012-DA (OBD) includes several appendices for

- diagnostic trouble code naming guidelines,
- powertrain system diagnostic trouble codes,
- network communication system, body systems, chassis systems, and
- DTC failure category and subtype definition.

SAE Digital Annex revision procedure

New emissions-related regulatory requirements drive new in-vehicle technology to lower emissions. New technology-related OBD monitor data and diagnostic trouble codes need to be standardized to support the external (off-board) “generic” test equipment. All relevant information is proposed by the automotive industry represented by members of the appropriate SAE task force.

Revision request forms and instructions for updating the registers to this part of ISO 15031 can be obtained on the Registration Authority’s website at:

<http://www.sae.org/servlets/works/committeeHome.do?comtID=TEVDS9>

The column titled "Resources" shows a document with the title: J2012-DA_Revision_Request_Form.doc. Double click on the name and you will be asked to download the document with the filename:

SAE J2012-DA_Revision_Request_Form.doc

Fill out the revision request form with your request.

Please send e-mail with completed revision request form as attachment to:

Road vehicles — Communication between vehicle and external equipment for emissions-related diagnostics —

Part 6: Diagnostic trouble code definitions

1 Scope

This part of ISO 15031 provides uniformity for standardized diagnostic trouble codes (DTC) that electrical/electronic On-Board Diagnostic (OBD) systems of motor vehicles are required to report when malfunctions are detected. It further provides guidance for uniform messages (text descriptor) associated with these codes.

This part of ISO 15031 specifies the rules and guidelines for the definition of the following:

- a) the diagnostic trouble code format, which consists of the following:
 - 1) addressing format;
 - 2) structure;
 - 3) messages;
- b) a description of the standardized set of diagnostic trouble codes and descriptions contained in SAE J2012-DA. The two most significant bytes of a DTC may be decoded according to two different lists in two formats: DTC Format Identifier 00₁₆ and 04₁₆;
- c) a description of the standardized set of diagnostic trouble codes subtypes known as failure types contained in SAE J2012-DA (applies only when 3-byte DTCs are used).

This part of ISO 15031 specifies all general rules and guidelines to define new diagnostic trouble codes. This part of ISO 15031 references SAE J2012-DA (Digital Annex), which includes all standardized DTCs (number and text descriptor) as well as all diagnostic trouble codes subtypes known as failure types.

2 Normative references

The following documents, in whole or in part, are normatively referenced in this document and are indispensable for its application. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

ISO/IEC 10731:1994, *Information technology — Open Systems Interconnection — Basic Reference Model — Conventions for the definition of OSI services*

ISO 15031-2, *Road vehicles — Communication between vehicle and external equipment for emissions-related diagnostics — Part 2: Guidance on terms, definitions, abbreviations and acronyms*

ISO 15031-5, *Road vehicles — Communication between vehicle and external equipment for emissions-related diagnostics — Part 5: Emissions-related diagnostic services*
