# Standarder får världen att fungera

*SIS (Swedish Standards Institute) är en fristående ideell förening med medlemmar från både privat och offentlig sektor. Vi är en del av det europeiska och globala nätverk som utarbetar internationella standarder. Standarder är dokumenterad kunskap utvecklad av framstående aktörer inom industri, näringsliv och samhälle och befrämjar handel över gränser, bidrar till att processer och produkter blir säkrare samt effektiviserar din verksamhet.*

## Delta och påverka

Som medlem i SIS har du möjlighet att påverka framtida standarder inom ditt område på nationell, europeisk och global nivå. Du får samtidigt tillgång till tidig information om utvecklingen inom din bransch.

## Ta del av det färdiga arbetet

Vi erbjuder våra kunder allt som rör standarder och deras tillämpning. Hos oss kan du köpa alla publikationer du behöver – allt från enskilda standarder, tekniska rapporter och standardpaket till handböcker och onlinetjänster. Genom vår webbtjänst e-nav får du tillgång till ett lättnavigerat bibliotek där alla standarder som är aktuella för ditt företag finns tillgängliga. Standarder och handböcker är källor till kunskap. Vi säljer dem.

## Utveckla din kompetens och lyckas bättre i ditt arbete

Hos SIS kan du gå öppna eller företagsinterna utbildningar kring innehåll och tillämpning av standarder. Genom vår närhet till den internationella utvecklingen och ISO får du rätt kunskap i rätt tid, direkt från källan. Med vår kunskap om standarders möjligheter hjälper vi våra kunder att skapa verklig nytta och lönsamhet i sina verksamheter.

**Vill du veta mer om SIS eller hur standarder kan effektivisera din verksamhet är du välkommen in på [www.sis.se](http://www.sis.se) eller ta kontakt med oss på tel 08-555 523 00.**

# Standards make the world go round

*SIS (Swedish Standards Institute) is an independent non-profit organisation with members from both the private and public sectors. We are part of the European and global network that draws up international standards. Standards consist of documented knowledge developed by prominent actors within the industry, business world and society. They promote cross-border trade, they help to make processes and products safer and they streamline your organisation.*

## Take part and have influence

As a member of SIS you will have the possibility to participate in standardization activities on national, European and global level. The membership in SIS will give you the opportunity to influence future standards and gain access to early stage information about developments within your field.

## Get to know the finished work

We offer our customers everything in connection with standards and their application. You can purchase all the publications you need from us - everything from individual standards, technical reports and standard packages through to manuals and online services. Our web service e-nav gives you access to an easy-to-navigate library where all standards that are relevant to your company are available. Standards and manuals are sources of knowledge. We sell them.

## Increase understanding and improve perception

With SIS you can undergo either shared or in-house training in the content and application of standards. Thanks to our proximity to international development and ISO you receive the right knowledge at the right time, direct from the source. With our knowledge about the potential of standards, we assist our customers in creating tangible benefit and profitability in their organisations.

**If you want to know more about SIS, or how standards can streamline your organisation, please visit [www.sis.se](http://www.sis.se) or contact us on phone +46 (0)8-555 523 00**

Den internationella standarden ISO 14298:2013 gäller som svensk standard. Detta dokument innehåller den officiella engelska versionen av ISO 14298:2013.

The International Standard ISO 14298:2013 has the status of a Swedish Standard. This document contains the official English version of ISO 14298:2013.

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2. [www.iso.org/directives](http://www.iso.org/directives)

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received. [www.iso.org/patents](http://www.iso.org/patents)

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

The committee responsible for this document is ISO/TC 130, *Graphic technology*.

# Introduction

## General

This International Standard specifies requirements for a security printing management system for security printers.

Current security printing management practices lack sufficient guarantees that effective security controls are maintained to protect the interest of the customer as well as the general public. Using this International Standard the organization establishes, documents, implements and maintains a security printing management system. This security printing management system is regularly reviewed to continually improve its effectiveness. It is recognized that customer requirements sometimes exceed the requirements of this International Standard so the security printing management system also addresses customer requirements that are beyond the scope of this International Standard.

The adoption of a security printing management system is a strategic decision of an organization. The design and implementation of an organization's security printing management system is influenced by varying needs, particular objectives, products provided, processes employed, security environment, cultural issues, legal limitations, risk assessment and by size and structure of the organization.

To achieve the objectives of this security printing management system standard measures are taken to mitigate all of the security threats determined by an organizational risk assessment. Such controls focus upon reducing, eliminating and preventing acts that compromise the security printing management system of the organization.

It is not the intent of this International Standard to obtain uniformity in the structure of the security printing management system or uniformity of documented information. The security printing management system complies with laws and regulations in force. The requirements specified in this International Standard are supplementary to requirements for products and processes of an organization and allow for additional specific requirements from the customer.

This International Standard is intended to apply to security printers. It contains requirements that when implemented by a security printer may be objectively audited for certification/registration purposes.

## Process approach

This International Standard promotes the adoption of a process approach when developing, implementing and improving the effectiveness of a security printing management system.

The application of a system of processes within an organization, together with the identification and interaction of these processes, and their management, is referred to as a "process approach". An advantage of a "process approach" is the ongoing control that it provides over the interaction between individual processes within the system of processes, as well as over their combination.

## Basic principles

When implemented, the security printing management system:

- a) achieves the security of products, processes, means of production, premises, information, raw material supplies;
- b) is used to continue to meet demonstrably the requirements, and naturally, the needs of customers;
- c) affords management the confidence that the targeted degree of security is actually achieved and remains effective;
- d) affords the customers the confidence that the agreed nature and degree of security is or will be attained.

This International Standard prescribes which elements a security printing management system contains and not how a specific organization implements these elements.

# Graphic technology — Management of security printing processes

## 1 Scope

This International Standard specifies requirements for a security printing management system for security printers.

This International Standard specifies a minimum set of security printing management system requirements. Organizations ensure that customer security requirements are met as appropriate provided these do not conflict with the requirements of this International Standard.

## 2 Normative references

No normative references are cited.

## 3 Terms and definitions

For the purposes of this document the following terms and definitions apply.

NOTE Italic type in a definition indicates a cross-reference to another term defined in this clause; the number reference for the term is given in parentheses.

### 3.1 organization

person or group of people that has its own functions with responsibilities, authorities and relationships to achieve its *objectives* (3.8)

Note 1 to entry: The concept of organization includes but is not limited to sole-trader, company, corporation, firm, enterprise, authority, partnership, charity or institution, or part or combination thereof, whether incorporated or not, public or private.

### 3.2 interested party

stakeholder

person or *organization* (3.1) that can affect, be affected by, or perceive themselves to be affected by a decision or activity

### 3.3 requirement

need or expectation that is stated, generally implied or obligatory

Note 1 to entry: “Generally implied” means that it is custom or common practice for the organization and interested parties that the need or expectation under consideration is implied.

Note 2 to entry: A specified requirement is one that is stated, for example in documented information.

### 3.4 management system

set of interrelated or interacting elements of an *organization* (3.1) to establish *policies* (3.7) and *objectives* (3.8), and *processes* (3.12) to achieve those objectives

Note 1 to entry: A management system can address a single discipline or several disciplines.

Note 2 to entry: The system elements include the organization's structure, roles and responsibilities, planning, operation, etc.

Note 3 to entry: The scope of a management system may include the whole of the organization, specific and identified functions of the organization, specific and identified sections of the organization, or one or more functions across a group of organizations.

Note 4 to entry: A management system contains documented information to direct and control the organization.

### 3.5 top management

person or group of people who directs and controls an *organization* (3.1) at the highest level

Note 1 to entry: Top management has the power to delegate authority and provide resources within the organization.

Note 2 to entry: If the scope of the *management system* (3.4) covers only part of an organization then top management refers to those who direct and control that part of the organization.

### 3.6 effectiveness

extent to which planned activities are realized and planned results achieved

### 3.7 policy

intentions and direction of an *organization* (3.1) as formally expressed by its *top management* (3.5)

### 3.8 objective

result to be achieved

Note 1 to entry: An objective can be strategic, tactical, or operational.

Note 2 to entry: Objectives can relate to different disciplines (such as financial, health and safety, and environmental goals) and can apply at different levels [such as strategic, organization-wide, project, product and *process* (3.12)].

Note 3 to entry: An objective can be expressed in other ways, e.g. as an intended outcome, a purpose, an operational criterion, as a *security objective* (3.32) or by the use of other words with similar meaning (e.g. aim, goal, or target).

Note 4 to entry: In the context of security printing management systems *security objectives* (3.32) are set by the organization, consistent with the security policy, to achieve specific results.

### 3.9 risk

effect of uncertainty

Note 1 to entry: An effect is a deviation from the expected — positive or negative.

Note 2 to entry: Uncertainty is the state, even partial, of deficiency of information related to, understanding or knowledge of, an event, its consequence, or likelihood.

Note 3 to entry: Risk is often characterized by reference to potential *events* (ISO Guide 73, 3.5.1.3) and *consequences* (ISO Guide 73:2009, 3.6.1.3), or a combination of these.

Note 4 to entry: Risk is often expressed in terms of a combination of the consequences of an event (including changes in circumstances) and the associated *likelihood* (ISO Guide 73:2009, 3.6.1.1) of occurrence.

### 3.10 competence

ability to apply knowledge and skills to achieve intended results

### 3.11

#### **documented information**

information required to be controlled and maintained by an *organization* (3.1) and the medium on which it is contained

Note 1 to entry: Documented information can be in any format and media and from any source.

Note 2 to entry: Documented information can refer to the *management system* (3.4), including related *processes* (3.12); information created in order for the organization to operate (documentation); and evidence of results achieved (records).

### 3.12

#### **process**

set of interrelated or interacting activities which transforms inputs into outputs

### 3.13

#### **performance**

measurable result

Note 1 to entry: Performance can relate either to quantitative or qualitative findings.

Note 2 to entry: Performance can relate to the management of activities, *processes* (3.12), products (including services), systems or *organizations* (3.1).

### 3.14

#### **outsource (verb)**

make an arrangement where an external *organization* (3.1) performs part of an organization's function or *process* (3.12)

Note 1 to entry: An external organization is outside the scope of the *management system* (3.4), although the outsourced function or process is within the scope.

### 3.15

#### **monitoring**

determining the status of a system, a *process* (3.12) or an activity

Note 1 to entry: To determine the status there may be a need to check, measure, supervise or critically observe.

### 3.16

#### **measurement**

*process* (3.12) to determine a value

### 3.17

#### **audit**

systematic, independent and documented *process* (3.12) for obtaining audit evidence and evaluating it objectively to determine the extent to which the audit criteria are fulfilled

Note 1 to entry: An audit can be an internal audit (first party) or an external audit (second party or third party), and it can be a combined audit (combining two or more disciplines).

Note 2 to entry: "Audit evidence" and "audit criteria" are defined in ISO 19011.

### 3.18

#### **conformity**

fulfilment of a *requirement* (3.3)

### 3.19

#### **nonconformity**

non-fulfilment of a *requirement* (3.3)

### 3.20

#### **correction**

action to eliminate a detected *nonconformity* (3.19)
