Standarder får världen att fungera

SIS (Swedish Standards Institute) är en fristående ideell förening med medlemmar från både privat och offentlig sektor. Vi är en del av det europeiska och globala nätverk som utarbetar internationella standarder. Standarder är dokumenterad kunskap utvecklad av framstående aktörer inom industri, näringsliv och samhälle och befrämjar handel över gränser, bidrar till att processer och produkter blir säkrare samt effektiviserar din verksamhet.

Delta och påverka

Som medlem i SIS har du möjlighet att påverka framtida standarder inom ditt område på nationell, europeisk och global nivå. Du får samtidigt tillgång till tidig information om utvecklingen inom din bransch.

Ta del av det färdiga arbetet

Vi erbjuder våra kunder allt som rör standarder och deras tillämpning. Hos oss kan du köpa alla publikationer du behöver – allt från enskilda standarder, tekniska rapporter och standardpaket till handböcker och onlinetjänster. Genom vår webbtjänst e-nav får du tillgång till ett lättnavigerat bibliotek där alla standarder som är aktuella för ditt företag finns tillgängliga. Standarder och handböcker är källor till kunskap. Vi säljer dem.

Utveckla din kompetens och lyckas bättre i ditt arbete

Hos SIS kan du gå öppna eller företagsinterna utbildningar kring innehåll och tillämpning av standarder. Genom vår närhet till den internationella utvecklingen och ISO får du rätt kunskap i rätt tid, direkt från källan. Med vår kunskap om standarders möjligheter hjälper vi våra kunder att skapa verklig nytta och lönsamhet i sina verksamheter.

Vill du veta mer om SIS eller hur standarder kan effektivisera din verksamhet är du välkommen in på www.sis.se eller ta kontakt med oss på tel 08-555 523 00.

Standards make the world go round

SIS (Swedish Standards Institute) is an independent non-profit organisation with members from both the private and public sectors. We are part of the European and global network that draws up international standards. Standards consist of documented knowledge developed by prominent actors within the industry, business world and society. They promote cross-border trade, they help to make processes and products safer and they streamline your organisation.

Take part and have influence

As a member of SIS you will have the possibility to participate in standardization activities on national, European and global level. The membership in SIS will give you the opportunity to influence future standards and gain access to early stage information about developments within your field.

Get to know the finished work

We offer our customers everything in connection with standards and their application. You can purchase all the publications you need from us - everything from individual standards, technical reports and standard packages through to manuals and online services. Our web service e-nav gives you access to an easy-to-navigate library where all standards that are relevant to your company are available. Standards and manuals are sources of knowledge. We sell them.

Increase understanding and improve perception

With SIS you can undergo either shared or in-house training in the content and application of standards. Thanks to our proximity to international development and ISO you receive the right knowledge at the right time, direct from the source. With our knowledge about the potential of standards, we assist our customers in creating tangible benefit and profitability in their organisations.

If you want to know more about SIS, or how standards can streamline your organisation, please visit www.sis.se or contact us on phone +46 (0)8-555 523 00

Europastandarden EN 16763:2017 gäller som svensk standard. Detta dokument innehåller den officiella engelska versionen av EN 16763:2017.

The European Standard EN 16763:2017 has the status of a Swedish Standard. This document contains the official English version of EN 16763:2017.

Services for fire safety systems and security systems

Prestations de services pour les systèmes de sécurité
incendie et les systèmes de sûreté

Dienstleistungen für Brandsicherheitsanlagen und
Sicherheitsanlagen

This European Standard was approved by CEN on 23 October 2016.

CEN and CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN and CENELEC member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN and CENELEC member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN and CENELEC members are the national standards bodies and national electrotechnical committees of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

European foreword

This document (EN 16763:2017) has been prepared by Technical Committee CEN-CENELEC/TC 4 “Services for fire safety and security systems”, the secretariat of which is held by DIN.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by July 2017, and conflicting national standards shall be withdrawn at the latest by July 2017.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN shall not be held responsible for identifying any or all such patent rights.

According to the CEN-CENELEC Internal Regulations, the national standards organisations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

Introduction

Many national and regional authorities and organizations within Europe publish services standards for the planning, design, installation, commissioning, verification, handover or maintenance of fire safety systems and/or security systems. This European Standard is intended to create a common understanding for a minimum service level by establishing criteria for the service level of service providers, the involved staff and the output of services provided.

The European Parliament and the Council passed into law on 2006-12-12 the directive 2006/123/EC “Services in the internal market” (SD). This Service Directive establishes general provisions facilitating service providers the freedom of establishment and the free movement of services within the EU, while maintaining a high quality of services (SD, Article 1-1). The SD states in Article 26 for a “Policy on Quality of Services” to enhance qualified service compatibility between the Member States. This European Standard was prepared to support the intention of Article 26-5 of the SD.

This European Standard does not replace the work of other CEN/CENELEC committees such as CEN/TC 72, CLC/TC 79 and CEN/TC 191. It should be read in conjunction with their standards and application guidelines for the use of their products and systems. Only services for the systems within the scopes of CEN/TC 72, CLC/TC 79 and CEN/TC 191 are covered in this European Standard with the exceptions defined in the scope.

This European Standard is intended to be applied in conjunction with application guidelines, either European (if any) or national, as well as with national laws and regulations in the field of expertise and can be used as the basis for establishing certification schemes for declared services but is not intended to be applied on its own as a certification scheme.

Figure 1 shows the position of this European Standard within the relevant European Standards framework.

Having all parts of Figure 1 will help to achieve a consistent implementation of this European Standard.

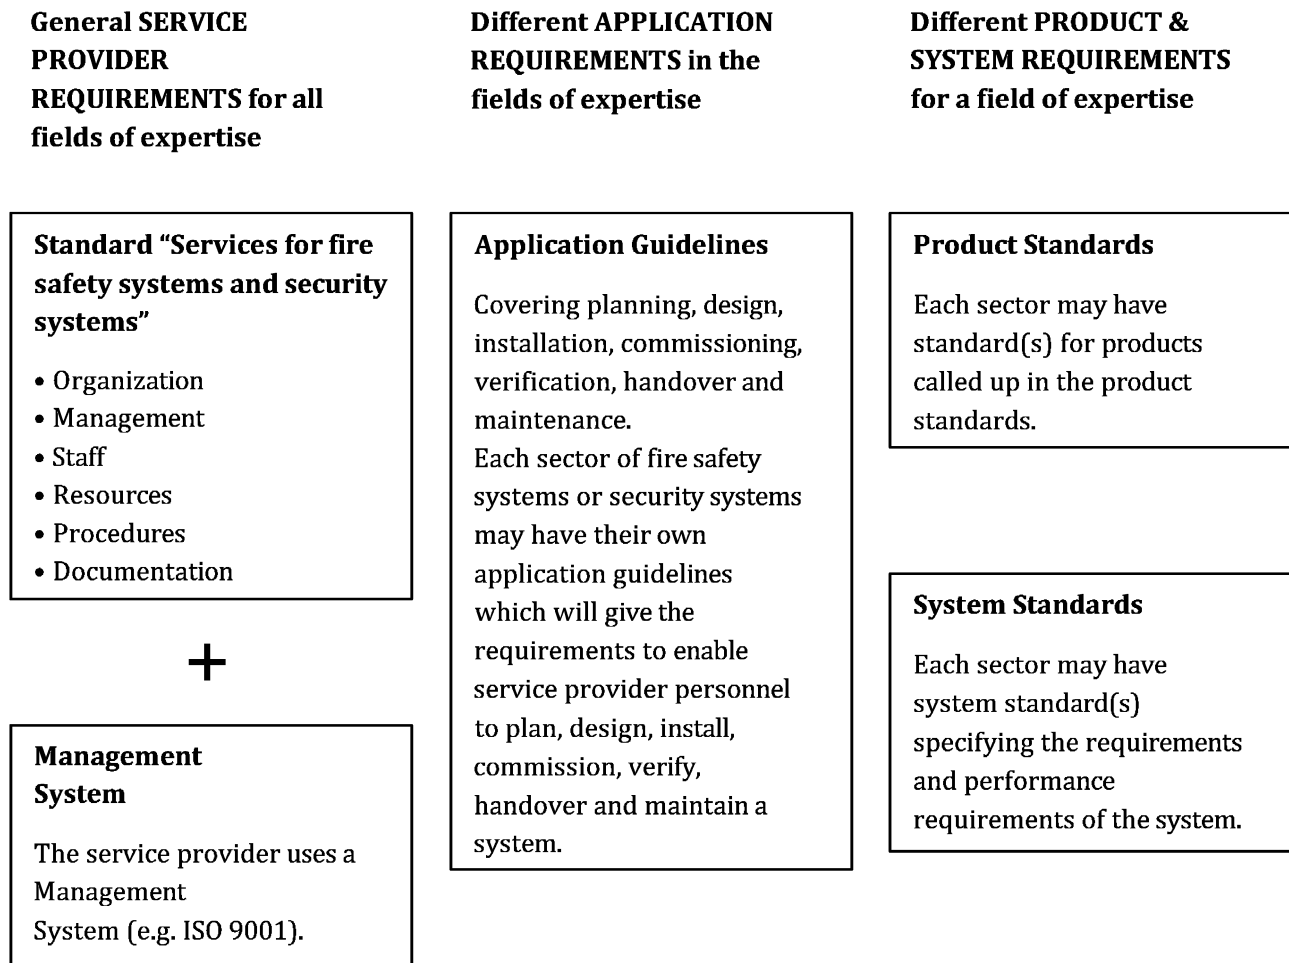

Figure 1 — Position of this European Standard within European Standards framework

1 Scope

This European Standard specifies the minimum requirements for service providers as well as the competencies, knowledge and skills of their involved staff charged with the planning, design, installation, commissioning, verification, handover or maintenance of fire safety systems and/or security systems, regardless whether these services are provided on-site or remotely.

This European Standard is applicable to services for:

- a) fire safety systems including, but not limited to, fire detection and fire alarm systems, fixed firefighting systems and smoke and heat control systems;
- b) security systems including, but not limited to, intruder and hold-up alarm systems, access control systems, external perimeter security systems and video surveillance systems;
- c) a combination of such systems including those parts of an alarm transmission system for which the service provider has contractually accepted responsibility.

Social alarm systems and alarm receiving centres are not included.

This European Standard is applicable regardless of project size.

This European Standard is applicable regardless of the service provider's organizational structure and size.

2 Terms and definitions

For the purposes of this document, the following terms and definitions apply.

**2.1
authorized person of the service provider**
person(s) that represent(s) the service provider, holds decision-making authority and makes commercial and contractual commitments

**2.2
staff**
persons working under the responsibility of the service provider

**2.3
system**
set of interacting or interdependent components forming an integrated whole

**2.4
subcontractor**
individual or organization contracted to perform part of the obligations of another provider's contract

**2.5
stage of work**
self-contained element of work

**2.6
field of expertise**
area of activity in which specific knowledge and technology are applied, and for which specific competencies in one or more of the stages of work are required

2.7

declared services

stages of work in a field of expertise in which the service provider operates

2.8

service provider

organization or part of an organization delivering one or more services to a client

2.9

planning

specifications of protection objectives and scope of the system(s) based on identified risks and known boundary conditions

2.10

design

selection and location of components such that the resulting system meets the specified system objectives of the planning

2.11

installation

implementation of the design, specifically the assembling, mounting and connecting of the relevant system components

2.12

commissioning

activating and testing of the system according to the design

2.13

verification

process of confirming that the commissioned system meets the planning, design, installation and commissioning requirements

2.14

handover

process of transferring the responsibility of the system to the organization specified in the contract

2.15

maintenance

combination of preventive and corrective activities during the life of the system, which are intended to retain it in, or restore it to, a state in which it can perform the required function

2.16

client

party for which services are provided

2.17

acknowledged rule of technology

technical provision acknowledged by a majority of representative experts as reflecting the state of the art
