# Standarder får världen att fungera

*SIS (Swedish Standards Institute) är en fristående ideell förening med medlemmar från både privat och offentlig sektor. Vi är en del av det europeiska och globala nätverk som utarbetar internationella standarder. Standarder är dokumenterad kunskap utvecklad av framstående aktörer inom industri, näringsliv och samhälle och befrämjar handel över gränser, bidrar till att processer och produkter blir säkrare samt effektiviserar din verksamhet.*

## Delta och påverka

Som medlem i SIS har du möjlighet att påverka framtida standarder inom ditt område på nationell, europeisk och global nivå. Du får samtidigt tillgång till tidig information om utvecklingen inom din bransch.

## Ta del av det färdiga arbetet

Vi erbjuder våra kunder allt som rör standarder och deras tillämpning. Hos oss kan du köpa alla publikationer du behöver – allt från enskilda standarder, tekniska rapporter och standardpaket till handböcker och onlinetjänster. Genom vår webbtjänst e-nav får du tillgång till ett lättnavigerat bibliotek där alla standarder som är aktuella för ditt företag finns tillgängliga. Standarder och handböcker är källor till kunskap. Vi säljer dem.

## Utveckla din kompetens och lyckas bättre i ditt arbete

Hos SIS kan du gå öppna eller företagsinterna utbildningar kring innehåll och tillämpning av standarder. Genom vår närhet till den internationella utvecklingen och ISO får du rätt kunskap i rätt tid, direkt från källan. Med vår kunskap om standarders möjligheter hjälper vi våra kunder att skapa verklig nytta och lönsamhet i sina verksamheter.

**Vill du veta mer om SIS eller hur standarder kan effektivisera din verksamhet är du välkommen in på [www.sis.se](http://www.sis.se) eller ta kontakt med oss på tel 08-555 523 00.**

# Standards make the world go round

*SIS (Swedish Standards Institute) is an independent non-profit organisation with members from both the private and public sectors. We are part of the European and global network that draws up international standards. Standards consist of documented knowledge developed by prominent actors within the industry, business world and society. They promote cross-border trade, they help to make processes and products safer and they streamline your organisation.*

## Take part and have influence

As a member of SIS you will have the possibility to participate in standardization activities on national, European and global level. The membership in SIS will give you the opportunity to influence future standards and gain access to early stage information about developments within your field.

## Get to know the finished work

We offer our customers everything in connection with standards and their application. You can purchase all the publications you need from us - everything from individual standards, technical reports and standard packages through to manuals and online services. Our web service e-nav gives you access to an easy-to-navigate library where all standards that are relevant to your company are available. Standards and manuals are sources of knowledge. We sell them.

## Increase understanding and improve perception

With SIS you can undergo either shared or in-house training in the content and application of standards. Thanks to our proximity to international development and ISO you receive the right knowledge at the right time, direct from the source. With our knowledge about the potential of standards, we assist our customers in creating tangible benefit and profitability in their organisations.

**If you want to know more about SIS, or how standards can streamline your organisation, please visit [www.sis.se](http://www.sis.se) or contact us on phone +46 (0)8-555 523 00**

Den internationella standarden ISO 13012-1:2009 gäller som svensk standard. Detta dokument innehåller den officiella engelska versionen av ISO 13012-1:2009.

The International Standard ISO 13012-1:2009 has the status of a Swedish Standard. This document contains the official version of ISO 13012-1:2009.

## SS-ISO 13012-1:2017 (E)

### Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 13012-1 was prepared by Technical Committee ISO/TC 4, *Rolling bearings*, Subcommittee SC 11, *Linear motion rolling bearings*.

This first edition of ISO 13012-1 cancels and replaces ISO 13012:1998, which has been technically revised. It also incorporates the Technical Corrigendum, ISO 13012:1998/Cor.1:1999.

ISO 13012 consists of the following parts, under the general title *Rolling bearings — Accessories for sleeve type linear ball bearings*:

- *Part 1: Boundary dimensions and tolerances for series 1 and 3*
- *Part 2: Boundary dimensions and tolerances for series 5*

## **Introduction**

The use of sleeve type linear ball bearings can be facilitated by the selection of bearing housings, shafts, shaft support blocks, and shaft support rails. These items, referred to as accessories, can aid in the application of the sleeve type linear ball bearings to achieve the desired criteria of smooth, accurate, low friction linear motion free from chatter or stick-slip.

The appropriate selection of bearing housing type, shaft, and shaft support should be established between the manufacturer and the user.

This part of ISO 13012 was developed to be used with ISO 10285.

# Rolling bearings — Accessories for sleeve type linear ball bearings —

## Part 1: Boundary dimensions and tolerances for series 1 and 3

### 1 Scope

This part of ISO 13012 specifies the boundary dimensions, other relevant dimensions and their tolerances of accessories for sleeve type linear ball bearings which are specified in ISO 10285.

This part of ISO 13012 applies to:

housings —

- closed and adjustable flangeless housings for series 1 sleeve type linear ball bearings,
- closed and adjustable flanged housings for series 3 sleeve type linear ball bearings,
- open flanged housings for series 3 sleeve type linear ball bearings,
- closed and adjustable flangeless housings for series 3 sleeve type linear ball bearings,
- open and open adjustable flangeless housings for series 3 sleeve type linear ball bearings;

shaft support rails —

- standard height shaft support rails for series 3 sleeve type linear ball bearings,
- low height shaft support rails for series 3 sleeve type linear ball bearings;

shaft support blocks —

- flanged shaft support blocks for series 1 and 3 sleeve type linear ball bearings,
- flangeless shaft support blocks for series 1 and 3 sleeve type linear ball bearings;

shafts —

- solid and tubular shafts for series 1 and 3 sleeve type linear ball bearings.

### 2 Normative references

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

ISO 286-2, *ISO system of limits and fits — Part 2: Tables of standard tolerance grades and limit deviations for holes and shafts*

ISO 1132-1, *Rolling bearings — Tolerances — Part 1: Terms and definitions*

## SS-ISO 13012-1:2017 (E)

ISO 1302, *Geometrical Product Specifications (GPS) — Indication of surface texture in technical product documentation*

ISO 3754, *Steel — Determination of effective depth of hardening after flame or induction hardening*

ISO 5593, *Rolling bearings — Vocabulary*

ISO 10285:2007, *Rolling bearings — Sleeve type linear ball bearings — Boundary dimensions and tolerances*

ISO 15241, *Rolling bearings — Symbols for quantities*

ISO 24393, *Rolling bearings — Linear motion rolling bearings — Vocabulary*

### 3 Terms and definitions

For the purposes of this document, the terms and definitions given in ISO 1132-1, ISO 5593, ISO 10285, ISO 24393 and the following apply.

#### 3.1 flangeless housing

⟨sleeve type linear ball bearing⟩ bearing housing which has a face with bolt holes or threaded holes for attachment to a support surface nominally parallel to the bearing axis

#### 3.2 flanged housing

⟨sleeve type linear ball bearing⟩ bearing housing which has a mounting face with projecting lugs having bolt holes for attachment to a support surface nominally parallel to the bearing axis

#### 3.3 closed housing

⟨sleeve type linear ball bearing⟩ bearing housing in which the bearing seating is circumferentially continuous

#### 3.4 adjustable housing

⟨sleeve type linear ball bearing⟩ bearing housing with a longitudinal slit across its bearing seating which facilitates the mechanical adjustment of the bearing seating diameter

#### 3.5 open housing

⟨sleeve type linear ball bearing⟩ bearing housing with a longitudinal section removed to provide clearance over a shaft and support rail unit

#### 3.6 open adjustable housing

⟨sleeve type linear ball bearing⟩ bearing housing which has the features of both open and adjustable sleeve type linear ball bearing housings

#### 3.7 shaft support rail

longitudinal pedestal which provides continuous support to a shaft

NOTE Shaft support rails may be used with open sleeve type linear ball bearings.

#### 3.8 shaft support block

block which provides support to a shaft

NOTE Shaft support blocks are normally used to support the shaft at its ends and can be used with closed sleeve type, adjustable sleeve type or open sleeve type linear ball bearings.

### 3.9

#### shaft

basically cylindrical rod along which a linear ball bearing traverses.

## 4 Symbols

For the purposes of this document, the symbols given in ISO 15241 and the following apply.

The symbols (except those for tolerances) shown in Figures 1 to 10, and the values given in Tables 1 to 11, denote nominal dimensions unless specified otherwise.

NOTE Figures 1 to 10 are drawn schematically and do not necessarily show all design details.

### 4.1 Closed and adjustable flangeless housings for series 1 sleeve type linear ball bearings

See Table 1 and Figure 1.

$A$  (overall) width

$D_a$  seating diameter

$F_w$  bore diameter of ball complement of sleeve type linear ball bearing (reference)

$G$  designation of screw thread of attachment hole

$H$  distance from mounting face to centreline of seating diameter

$H_1$  (overall) height

$J$  centre distance between mounting bolt holes (length)

$L$  length of housing

$N$  diameter of bolt hole

### 4.2 Closed and adjustable flanged housings for series 3 sleeve type linear ball bearings

See Table 2 and Figure 2.

$A$  (overall) width

$A_1$  width of seating

$D_a$  seating diameter

$F_w$  bore diameter of ball complement of sleeve type linear ball bearing (reference)

$H$  distance from mounting face to centreline of seating diameter

$H_1$  height of flange

$H_2$  (overall) height

$J$  centre distance between bolt holes (length)

$J_1$  centre distance between bolt holes (width)

$L$  length of housing

$N$  diameter of bolt hole
