Standarder får världen att fungera

SIS (Swedish Standards Institute) är en fristående ideell förening med medlemmar från både privat och offentlig sektor. Vi är en del av det europeiska och globala nätverk som utarbetar internationella standarder. Standarder är dokumenterad kunskap utvecklad av framstående aktörer inom industri, näringsliv och samhälle och befrämjar handel över gränser, bidrar till att processer och produkter blir säkrare samt effektiviserar din verksamhet.

Delta och påverka

Som medlem i SIS har du möjlighet att påverka framtida standarder inom ditt område på nationell, europeisk och global nivå. Du får samtidigt tillgång till tidig information om utvecklingen inom din bransch.

Ta del av det färdiga arbetet

Vi erbjuder våra kunder allt som rör standarder och deras tillämpning. Hos oss kan du köpa alla publikationer du behöver – allt från enskilda standarder, tekniska rapporter och standardpaket till handböcker och onlinetjänster. Genom vår webbtjänst e-nav får du tillgång till ett lättnavigerat bibliotek där alla standarder som är aktuella för ditt företag finns tillgängliga. Standarder och handböcker är källor till kunskap. Vi säljer dem.

Utveckla din kompetens och lyckas bättre i ditt arbete

Hos SIS kan du gå öppna eller företagsinterna utbildningar kring innehåll och tillämpning av standarder. Genom vår närhet till den internationella utvecklingen och ISO får du rätt kunskap i rätt tid, direkt från källan. Med vår kunskap om standarders möjligheter hjälper vi våra kunder att skapa verklig nytta och lönsamhet i sina verksamheter.

Vill du veta mer om SIS eller hur standarder kan effektivisera din verksamhet är du välkommen in på www.sis.se eller ta kontakt med oss på tel 08-555 523 00.

Standards make the world go round

SIS (Swedish Standards Institute) is an independent non-profit organisation with members from both the private and public sectors. We are part of the European and global network that draws up international standards. Standards consist of documented knowledge developed by prominent actors within the industry, business world and society. They promote cross-border trade, they help to make processes and products safer and they streamline your organisation.

Take part and have influence

As a member of SIS you will have the possibility to participate in standardization activities on national, European and global level. The membership in SIS will give you the opportunity to influence future standards and gain access to early stage information about developments within your field.

Get to know the finished work

We offer our customers everything in connection with standards and their application. You can purchase all the publications you need from us - everything from individual standards, technical reports and standard packages through to manuals and online services. Our web service e-nav gives you access to an easy-to-navigate library where all standards that are relevant to your company are available. Standards and manuals are sources of knowledge. We sell them.

Increase understanding and improve perception

With SIS you can undergo either shared or in-house training in the content and application of standards. Thanks to our proximity to international development and ISO you receive the right knowledge at the right time, direct from the source. With our knowledge about the potential of standards, we assist our customers in creating tangible benefit and profitability in their organisations.

If you want to know more about SIS, or how standards can streamline your organisation, please visit www.sis.se or contact us on phone +46 (0)8-555 523 00

Den internationella standarden ISO 18436-1:2012 gäller som svensk standard. Detta dokument innehåller den officiella engelska versionen av ISO 18436-1:2012.

The International Standard ISO 18436-1:2012 has the status of a Swedish Standard. This document contains the official version of ISO 18436-1:2012.

This corrected version of ISO 18436-1:2012 incorporates a revised text of 7.2.

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 18436-1 was prepared by Technical Committee ISO/TC 108, *Mechanical vibration, shock and condition monitoring*, Subcommittee SC 5, *Condition monitoring and diagnostics of machines*.

This second edition cancels and replaces the first edition (ISO 18436-1:2004), which has been technically revised. It also incorporates the Technical Corrigendum ISO 18436-1:2004/Cor. 1:2006.

ISO 18436 consists of the following parts, under the general title *Condition monitoring and diagnostics of machines — Requirements for qualification and assessment of personnel*:

- *Part 1: Requirements for assessment bodies and the assessment process*
- *Part 2: Vibration condition monitoring and diagnostics*
- *Part 3: Requirements for training bodies and the training process*
- *Part 4: Field lubricant analysis*
- *Part 5: Lubricant laboratory technician/analyst*
- *Part 6: Acoustic emission*
- *Part 7: Thermography*

The following part is under preparation:

- *Part 8: Ultrasound*

The following part is planned:

- *Part 9: Condition monitoring specialists*

This corrected version of ISO 18436-1:2012 incorporates a revised text of 7.2.

Introduction

Condition monitoring and diagnostics of machines are integral parts of an effective maintenance programme. Non-intrusive technologies used in condition monitoring and fault diagnosis include vibration, infrared thermography, oil and wear debris analysis, acoustic and ultrasonic analysis, and electric signature analysis. In many instances, these technologies act as complimentary condition monitoring tools. The skills and expertise of the practitioners performing the measurements and analysing the data are critical to the effective application of these technologies.

This part of ISO 18436 defines the requirements for persons and organizations operating assessment systems in the non-intrusive machine condition monitoring and diagnostic technologies that use the technology parts of ISO 18436. General requirements for assessment body personnel are contained in this part of ISO 18436. Specific requirements for the assessment of personnel in condition monitoring and diagnostics are contained in ISO 18436-2 and ISO 18436-4 to ISO 18436-9.

In accordance with ISO/IEC 17000, an assessment body (person or organization) may be a first-party conformity assessment organization issuing a declaration of conformity, a second party issuing an attestation of conformity or it may be a third-party certification body compliant with ISO/IEC 17024 issuing certificates of conformity. This part of ISO 18436 specifies the general provisions for certification bodies; however, where applicable, they should apply to first and second parties.

Condition monitoring and diagnostics of machines — Requirements for qualification and assessment of personnel —

Part 1: Requirements for assessment bodies and the assessment process

1 Scope

This part of ISO 18436 specifies requirements for persons and organizations (“assessment body”) operating conformity assessment systems for personnel who perform machinery condition monitoring, identify machine faults, and recommend corrective action. Procedures for the conformity assessment of condition monitoring and diagnostic personnel are specified.

NOTE These requirements are in addition to those of ISO/IEC 17000, ISO/IEC 17024, and ISO/IEC 17050-1.

2 Normative references

The following documents, in whole or in part, are normatively referenced in this document and are indispensable for its application. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

ISO/IEC 17000:2004, *Conformity assessment — Vocabulary and general principles*

ISO/IEC 17024:2012, *Conformity assessment — General requirements for bodies operating certification of persons*

ISO/IEC 17050 (all parts), *Conformity assessment — Supplier’s declaration of conformity*

ISO 18436 (all relevant parts), *Condition monitoring and diagnostics of machines — Requirements for qualification and assessment of personnel*

3 Terms and definitions

For the purposes of this document, the terms and definitions given in ISO/IEC 17000, ISO/IEC 17024, ISO/IEC 17050 and the following apply.

3.1

certificate

certificate issued by a certification body in accordance with the conditions of its accreditation and bearing an accreditation symbol or statement

Note 1 to entry: The certificate shall state the relevant part of ISO 18436 dealing with the specific technology concerned

3.2

certification body

organization that meets the requirements of ISO/IEC 17024 for third-party certification bodies and issues a certificate of conformity

3.3

examination centre

centre approved by the certification body where qualification examinations are carried out

[SOURCE: ISO 9712:2012,^[1] 3.8.]

- 3.4 invigilator**
person authorized by the certification body to supervise examinations
[SOURCE: ISO 9712:2012,^[1] 3.12.]
- 3.5 technical committee for certification**
TCC
committee organized by an assigned certification body to direct the technical aspects of certification
- 3.6 significant interruption**
absence or change of activity which prevents the certified individual from practising the duties corresponding to the category in the method and the sector(s) within the certified scope, for either a continuous period in excess of one year or two or more periods for a total time exceeding two years

Note 1 to entry: Legal holidays or periods of sickness or courses of less than 30 days are not taken into account when calculating the interruption.
[SOURCE: ISO 9712:2012,^[1] 3.27, modified.]
- 3.7 first-party assessment**
conformity assessment activity that is performed by the person or organization that provides the condition monitoring personnel and issues a declaration (written attestation) of conformity
[SOURCE: ISO/IEC 17000:2004, 2.2, modified]
- 3.8 second-party assessment**
conformity assessment activity that is performed by a person or organization that has a user interest in the condition monitoring personnel of another organization
[SOURCE: ISO/IEC 17000:2004, 2.3, modified]
- 3.9 third-party assessment**
conformity assessment activity that is performed by an organization which is recognized to assess (evaluate) the competence of personnel and issue a certificate
[SOURCE: ISO/IEC 17000:2004, 2.4, modified]

4 Assessment body

4.1 Charter

The assessment process, which includes all procedures adopted to demonstrate the conformity of individuals with the requirements specified in this International Standard and leads to a written attestation of their qualifications, shall be administered by an assessment body.

4.2 General provisions

Qualifications for recognition shall not be based on limiting conditions, such as undue financial commitment, training by a specific organization, or membership in any specific organization. However, specific training courses involving standard curricula are required for recognition of compliance by an assessment body, which shall have a process to ensure adherence to the curricula.

There shall be no limit to the number of persons certified in any category.

The assessment body shall be responsible for granting, maintaining, renewing, extending, restricting and withdrawing certificates or recognition.

4.3 Requirements

An assessment body shall:

- a) conform to this part of ISO 18436 and to other relevant parts of ISO 18436 (see the complete listing in the Foreword) for personnel involved in the condition monitoring and diagnostics of machines;
- b) have the administrative resources needed to conduct examinations and administer examination centres;
- c) be independent of any commercial interest;
- d) use non-discriminatory policies and procedures in the administration of the certification system;
- e) comply with all applicable national and international laws.

In addition, a certification body shall be in accordance with ISO/IEC 17024:2012, Clauses 5 to 8.

4.4 Responsibilities

An assessment body shall:

- a) initiate, maintain and promote the assessment procedures to demonstrate the qualification of an individual to carry out tasks in machinery condition monitoring and diagnosis, which leads to written attestation of their qualifications;
- b) administer the procedures and operations for conformity assessment in accordance with the requirements of this part of ISO 18436, and a stringent code of ethics (see Annex A), including sanctions, that will apply to certificate holders and recognized persons;
- c) take the ultimate responsibility for the assessment procedures, including technical and administrative requirements;
- d) ensure the adherence to training curricula as specified in the individual technical parts of ISO 18436 (see the complete listing in the Foreword);
- e) approve properly staffed and equipped examination centres, which it shall monitor on a periodic basis;
- f) develop or approve suitable assessment examination questions;
- g) approve the eligibility of candidates for examination;
- h) authorize the time and location of the examination, the examination centre, and the invigilator or examiner for each examination;
- i) prepare and distribute examinations to the examination centre;
- j) receive and evaluate the completed examinations;
- k) notify the examinee of the results of the examination;
- l) issue the certificate or recognition of conformity to successful examinees;
- m) keep appropriate records of the operations of conformity;
- n) provide an overview of the examination results to the examinee upon written request;
- o) develop and implement renewal and recertification procedures and requirements;
- p) monitor all delegated functions.
